Unless otherwise stated, this Management's Discussion & Analysis ("MD&A") for The North West Company Inc. ("NWC") or its predecessor North West Company Fund ("NWF" or "Fund") and its subsidiaries (collectively, "North West Company", the "Company", "North West", or "NWC") is based on, and should be read in conjunction with the 2012 annual audited consolidated financial statements and accompanying notes. The Company's annual audited consolidated financial statements and accompanying notes for the year ended January 31, 2013 are in Canadian dollars, except where otherwise indicated, and are prepared in accordance with International Financial Reporting Standards ("IFRS").

Due to the transition to IFRS, comparative figures for the year ended January 31, 2011 ("2010") that were previously reported in the consolidated financial statements prepared in accordance with Canadian generally accepted accounting principles ("CGAAP") have been restated to conform with the accounting policies and financial statement presentation adopted under IFRS. The financial information for the fiscal years 2009 and prior was prepared in accordance with CGAAP and has not been restated. Further information on the transition to IFRS and the impact on the Company's consolidated financial statements is provided in the 2011 Annual Financial Report available on SEDAR at www.sedar.com or on the Company's website at www.northwest.ca.

The Board of Directors, on the recommendation of its Audit Committee, approved the contents of this MD&A on April 8, 2013 and the information contained in this MD&A is current to April 8, 2013, unless otherwise stated.

Forward-Looking Statements

This MD&A contains forward-looking statements about North West including its business operations, strategy and expected financial performance and condition. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "plans", "believes", "estimates", "intends", "targets", "projects", "forecasts" or negative versions thereof and other similar expressions, or future or conditional future financial performance (including sales, earnings, growth rates, dividends, debt levels, financial capacity, access to capital, and liquidity), ongoing business strategies or prospects, and possible future action by the Company, are also forward-looking statements. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Company, economic factors and the retail industry in general. They are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied by forward-looking statements made by the Company due to, but not limited to, important factors such as general economic, political and market factors in North America and internationally, interest and foreign exchange rates, changes in accounting policies and methods used to report financial condition, including uncertainties associated with critical accounting assumptions and estimates, the effect of applying future accounting changes, business competition, technological change, changes in government regulations and legislation, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, the Company's ability to complete strategic transactions and integrate acquisitions and the Company's success in anticipating and managing the foregoing risks. The reader is cautioned that the foregoing list of important factors is not exhaustive. Other risks are outlined in the Risk Management section of this MD&A and in the Risk Factors sections of the Annual Information Form. The reader is also cautioned to consider these and other factors carefully and not place undue reliance on forward-looking statements. Other than as specifically required by applicable law, the Company has no specific intention to update any forward-looking statements whether as a result of new information, future events or otherwise.

Additional information on the Company, including our Annual Information Form, can be found on SEDAR at www.sedar.com or on the Company's website at www.northwest.ca.

Management's Discussion & Analysis

OUR BUSINESS TODAY

The North West Company is a leading retailer to underserved rural communities and urban neighbourhood markets in the following regions: northern Canada, western Canada, rural Alaska, the South Pacific islands and the Caribbean. Our stores offer a broad range of products and services with an emphasis on food. Our value offer is to be the best local shopping choice for everyday household and local lifestyle needs.

North West's core strengths include: our ability to adapt to varied local values and priorities to forge community partnerships; our on-the-ground presence with hard-to-replicate skills, insights and facilities; our logistics expertise in moving product to, and operating stores within, remote or difficult-to-reach markets; and our ability to apply these strengths within complementary niche businesses.

North West has a rich enterprising legacy as one of the longest continuing retail enterprises in the world. The Company traces its roots back to 1668 with many of our store locations in northern Canada and Alaska having been in operation for over 200 years. Today these northern stores serve communities with populations from 500 to 8,000. A typical store is 7,500 square feet in size and offers food, family apparel, housewares, appliances, outdoor products and services such as fuel, post offices, pharmacies, income tax return preparation, quick-service prepared food, commercial business sales, prepaid card products, ATMs, cheque cashing and propriety credit programs.

Growth at North West has come from market share expansion within existing locations and from applying our expertise and infrastructure to new markets and complementary businesses. The latter includes wholesaling to independent stores, opening Giant Tiger junior discount stores in rural communities and urban neighbourhoods in western Canada, and our late 2007 acquisition of Cost-U-Less, Inc., a chain of mid-sized warehouse format stores serving the South Pacific islands and the Caribbean.

A key strength and ongoing strategy of North West is to adapt to unique local lifestyles and cultures, and capture selling opportunities better than our competition. Store development flexibility, store management selection and education, store-level merchandise ordering, community relations and enterprising incentive plans are all ingredients of the model we have built to support this leading market position. We believe that continued, efficient enhancement of our execution skills in general, and our logistics and selling skills specifically, are essential components in meeting customer needs within each market we serve.

North West delivers its products and services through the following retail banners and wholesale businesses, in two reporting segments:

Canadian Operations

- **121 Northern** stores, offering a combination of food, financial services and general merchandise to remote northern Canadian communities;
- **31 Giant Tiger ("GT")** junior discount stores, offering family fashion, household products and food to urban neighbourhoods and larger rural centers in western Canada;
- **7 NorthMart** stores, targeted at larger northern markets with an emphasis on an expanded selection of fresh foods, fashion and health products and services;
- **13 Quickstop** convenience stores, offering ready-to-eat foods, fuel and related services;
- **1 Valu Lots** discount center and direct-to-customer food distribution outlet for remote communities in Canada;
- **1 Solo Market** store, targeted at less remote, rural markets;
- **1 NorthMart Drug Store**, a stand-alone pharmacy and convenience store combination;
- **Crescent Multi Foods ("CMF")**, a distributor of produce and fresh meats to independent grocery stores in Saskatchewan, Manitoba and northwestern Ontario;
- **2 North West Company Fur Marketing** outlets, trading in furs and offering Aboriginal handicrafts and authentic Canadian heritage products; and
- **The Inuit Art Marketing Service**, Canada's largest distributor of Inuit art.

International Operations

- **30 AC Value Centers ("AC")**, stores similar to Northern and NorthMart, offering a combination of food and general merchandise to communities across remote and rural regions of Alaska;
- **3 Quickstop** convenience stores within rural Alaska;
- **Pacific Alaska Wholesale ("PAW")**, a leading distributor to independent grocery stores and individual households in rural Alaska;
- **13 Cost-U-Less (CUL)**, mid-sized warehouse stores, offering discount food and general merchandise products to island communities in the South Pacific and the Caribbean; and
- **1 Island Fresh Supermarket**, neighborhood store in Guam offering convenience with an emphasis on fresh and prepared foods.

VISION

At North West our mission is to be a trusted provider of goods and services within hard-to-reach, underserved and less developed markets. Our vision is to bring products and services to communities that help people live better. At the retail level, this starts with our customers' ability and desire to shop locally with us for the widest possible range of products and services that meet their everyday needs. We do this by being more accessible and convenient, more locally adaptable, friendlier and having the lowest local cost, enabled by lean, innovative processes. For our associates, we want to be a preferred, fulfilling place to work. For our investors, we want to deliver superior, top-quartile total returns over the long term.

PRINCIPLES

The way we work at North West is shaped by six core principles: *Customer Driven, Enterprising, Passion, Accountability, Trust, and Personal Balance.*

Customer Driven is our practice of always looking through the eyes of our customers while recognizing our local presence as a supportive community citizen.

Enterprising is our spirit of innovation, improvement and growth, reflected in our unrelenting focus on new and better products, services and processes.

Passion refers to our connection to our work, our privileged local market presence and the opportunity to find solutions that make a difference in peoples' lives.

Accountability is our management approach to getting work done through effective roles, tasks and resources.

Trust at North West means doing what you say you will do, with fairness, integrity and respect.

Personal Balance is our commitment to sustaining ourselves and our organization, so that we work effectively for our customers and communities over the long term.

STRATEGIES

The strategies at North West are aligned with a total return approach to investment performance. We aim to deliver top quartile returns through an equal emphasis on growth and income yield with opportunities considered in terms of their growth potential and ability to sustain an attractive cash return.

The Company's long-range plans ("LRP") are developed in multi-year cycles and are reviewed and adjusted on an annual basis or as required at the senior management and board levels. 2009 was the start of a LRP cycle and included an in-depth assessment of North West's past performance, opportunity gaps within each business segment, and new business growth potential.

The strategic rationale for this approach fully considered our past successes and unrealized opportunities. Over the previous cycle, food market share and margin rates had increased through better sourcing and through more store-branded products that offered a value alternative to national brands. Our food growth strategy was augmented by opportunistically pursuing complimentary everyday products and services. These included financial services, post offices, retail gas bars and pharmacies. New store growth was achieved by acquiring independent stores in northern Canada and Alaska, through Giant Tiger store expansion in western Canada and through our acquisition of CUL in late 2007.

These initiatives developed the business beyond our core northern markets and merchandise mix but also stretched our resources and executive attention. The effect was that other, high potential operational elements within the "four walls" of our business were left without the necessary degree of focus, investment and leadership.

As a result of our 2009 LRP work, we identified operational excellence as the first priority within our existing retail network, themed as "*More Growth in Store*". This finding and subsequent direction-setting is based on gaps that we see within our current store base which, if effectively addressed, would deliver attractive financial returns over the next three to five years and set the foundation for new market, product and service growth over the long term.

The specific areas we have highlighted for attention further protect, grow and optimize the performance of our food business, which accounts for 77% of our sales base, the stability of our store teams, and the strength of our supply chain.

In addition to our "*More Growth in Store*" emphasis, NWC will complete an in-depth strategy assessment in 2013 to determine possible work directions over the following three to five years. Beyond the medium term potential of existing initiatives our scope will include the health and future of our general merchandise business, new market growth and complimentary business opportunities. We expect this work to be substantially completed by December 2013. Across this work we continue to emphasize new ideas, clear principles, execution, and the ability to track performance and we will carefully assess the long-term potential of any major new business, product or service, and the probability of achieving threshold returns on a sustainable and consistent basis.

Following is an update on the *More Growth in Store* strategic initiatives:

Initiative #1

Improve perishable food performance gaps

This initiative is a comprehensive reworking of products, processes and technology required to improve the performance of categories that attract higher activity costs and require more complex executions. These include Produce, Meat, Chilled, Frozen Food and Food Service.

Result

The emphasis in 2012 was on Produce and Fresh Meat categories. Findings from this work were also applied to Commercial Bakery, Fuel and Tobacco with further gains in these latter categories expected in 2013. The key drivers continue to be more controlled assortments, increased use of pre-packaged product, daily company-wide visibility on product waste, simplified ordering processes, enhanced inventory and margin management tools and training certification programs. After a slower start in 2011 because of the shift in discipline and attention that was required, 2012 moved at a faster, more productive pace. This is expected to continue into 2013 as new product categories are added. The financial impact has been very positive with Alaskan and northern Canada Produce and Fresh Meat gross profit dollars up 26% or \$11.0 million over the three years ending January 2013.

Initiative #2

Optimize in-stock position

This priority is highlighted by the fact that 87% of our sales (excluding Giant Tiger) are in everyday consumable products that depend on a strong in-stock position. This initiative focuses on improving in-stock rates through technology-enabled tracking and ordering processes that were launched in the second half of 2010 and have been further refined by adjusting product space allocations.

Result

In 2012, the average in-stock performance at our Alaskan and northern Canada stores improved by 470 basis points compared to the average in-stock rate in 2011. During the year we also implemented the processes and tracking from our in-stock initiative in our Cost-U-Less stores which resulted in an 820 basis point improvement in their in-stock performance over 2011. Combined with a wider range of products now being measured under this initiative, our average in-stock rate has generated an estimated annualized sales gain of \$9.0 million or 1.1% of the food sales base of these divisions.

In 2013, our in-stock work will be integrated into the everyday inventory focus at North West. Elements of our in-stock initiative will carry forward within new replenishment initiatives that build on the tracking capability of our Transportation Management System.

Initiative #3**Ensure store teams stability**

Within such a remote, diverse store network, our local skill and presence is a core advantage. Through our assessment, we identified a need to solidify our store teams so that they stay together longer in specific locations, deepening customer and community relationships, and building their business. For this to happen consistently, we are revamping recruitment, retention and store work processes to ensure we attract and retain highly capable, thoroughly trained store personnel in key roles.

This initiative specifically addresses the opportunity to optimize overall store performance by ensuring that a highly capable store team is in place within each store location for an average time of at least three years. Similar to other "More Growth in Store" work, 2012 was an important year for building momentum and putting in place proven methods to achieve desired stability levels.

Result

In 2012, a record number of managers were trained and placed in rewarding roles. Our search for talented managers takes us across Canada and the international markets we operate in. A new recruitment platform was implemented in 2012 to reduce the time and cost to hire candidates. The movement of management between stores to fill critical vacancies was a barrier to achievement of overall stability. To reduce the need to transfer employees, improved recruitment planning was implemented, store level succession planning was established and a pool of ready trained managers is being created. Our staff housing upgrade program, which provides a higher-standard housing benefit for store personnel recruited into northern communities, included capital spending of \$4.3 million in 2012. Work continued on success profiles for all store manager and district manager positions at North West with the development of coaching guides and specific competency training to develop skills that are key drivers of success at North West.

Initiative #4**Be "priced right"**

Better price management is a strategic opportunity at North West, especially in our more remote banners. Market-based pricing is more difficult due to limited local shopping options in many of these locations, and this requires a deeper, more sophisticated understanding of true costs and purchase volumes relative to price.

Result

2012 built on the success of major price reductions on nutritious perishable foods qualifying for Nutrition North Canada ("Nutrition North") freight subsidies that took effect in 2011. Air freight routing changes in mid-2012 achieved a significant savings in transportation costs to Baffin Island. Similar to the Nutrition North price reductions, these savings were fully and transparently passed on in the form of price reductions on key volume items.

Work was also completed across all food categories to ensure correct "landed" costs and prices that reflected the optimal relationship between like items and between national and store brands. The net effect of this work was to improve both sales tonnage and margins.

In 2013, we expect to find further efficiencies that can further reduce our cost of business, helping our customers realize even more value for their dollar and attract more local shopping.

Initiative #5**Build our supply chain advantage**

North West is a major shipper of merchandise and other freight into the remote markets that we serve. This creates an opportunity to work more collaboratively with our transportation partners to fully leverage our knowledge and forecasted volumes. The outcomes we expect from this strategy are improved product visibility and delivery service within a more productive and lower cost integrated logistics network.

Result

In 2012, \$1.7 million in outbound freight savings and distribution centre efficiencies were achieved through improved routing and freight rates across our supply chain network and the implementation of productivity tools in our Winnipeg Distribution Centre. A dedicated cross-functional team is working on the implementation of the \$7 million, transportation management system ("TMS"). The deployment of TMS at North West will utilize 40% more functionality than typical TMS implementations which speaks to the complexity of our diverse network of freight modes and carriers. For outbound shipments the TMS solution required the development of a custom track and trace system, smart-labeling of all warehouse and cross dock merchandise, enhanced warehouse management systems to facilitate load building in one system and the ability for air carriers to plan, execute and provide shipment status updates on shipments processed at their hubs.

We expect to have all phases of the project fully deployed by the third quarter of 2013 and estimate that, within 24 months following the roll-out, we will be able to further reduce our annual supply chain costs by approximately \$5 million. The net savings from TMS will be strategically reinvested to continue to bring greater value to our customers.

Initiative #6**Cascade our leadership principles into practices**

We consider our leadership principles to be the foundation for great, sustainable performance across all levels at North West. From our cashiers to our buyers and store managers, we recognize that effective management practices reflect these principles and align our work.

Result

2012 started and ended with a focus on our store management levels. In the first half of the year our progress was slower than expected due to personnel changes within our Human Resources team including a vacancy at the Vice-President, Human Resources position for most of 2012. CEO-led leadership sessions were a key part of our second half work and this will continue into 2013 assisted by the recruitment of a Vice-President, Human Resources and a greater time commitment from the entire senior management team.

KEY PERFORMANCE DRIVERS AND CAPABILITIES REQUIRED TO DELIVER RESULTS

The ability to protect and enhance the performance of northern store locations: Our stores in Alaska and northern Canada represent the highest potential for improved productivity and customer satisfaction. We believe that the shift in our culture and capability towards efficiency, innovation and operational excellence within our new LRP strategies is working and is the best path to achieve these goals.

The financial capability to sustain the competitiveness of our existing store base and to pursue growth: Our sustaining investments include replacement and renovated stores, staff housing, energy-efficiency and technology. Non-capital expenditures are centered on improvements to our in-store capabilities through more in-depth training programs and the on-going investment in our LRP work.

The ability to be a leading community store in every market we serve: This depends on our ability to tailor our store formats, product/service mix, community support and store associate employment offer, while still realizing the scale efficiencies of our size or the size of our alliance partners. A broad range of products, services and store sizes, combined with flexible technology platforms and “best practice” work processes, are all required to give us the ability to achieve this goal.

The ability to successfully add new stores and renew existing store leases: Our new store opening success depends on finding viable locations, communities that are interested in having our store services, willing sellers of independent stores or chains, and being able to integrate and accelerate their full contribution potential. Renewing store leases, especially when the landlord is a community development entity, depends on our track record of solid store operations, our positive community relations and the superior attractiveness of our retail store compared to other options. Other factors include achieving product sourcing, operating and transportation cost savings, while building strong, entrepreneurial store teams.

Our ability to build and maintain supportive community relations: Our ongoing community presence depends on our ability to be a trusted, open, respectful and adaptable organization. Our approach is to reflect community priorities first and invest in local causes with community development and healthy living being two examples. We facilitate regular meetings with community and regional leadership to build constructive relationships and to ensure that information and ideas are shared on a proactive basis.

Our ability to attract, retain and develop highly capable store level employees and work practices: Enhancing store stability and capability is an on-going priority that aligns with our goal of being a trusted local store. We continually invest in recruiting, retention and best practice work methods. This recognizes the important role played by our managers and other key store-level personnel in realizing local selling opportunities, meeting our customer service commitments and building and maintaining positive community relationships. It also recognizes the reality that remoteness, employment competition from other local sectors and other conditions of our markets create challenges in attracting and retaining people. Related to this is our on-going interest in hiring locally and assisting people to reach their potential.

Our ability to reduce costs across all of our store banners, improve competitiveness and create more time and skill at store level to sell merchandise: A key goal is to shift more staff time and skill towards selling merchandise tailored to the unique markets we serve, while reducing costs in the non-selling facets of store work. Productivity opportunities include labour scheduling, energy usage and inventory shrinkage. We have developed alliances with other non-competing retailers to provide sales and distribution services for certain products and services where we do not have the scale to achieve a lower cost structure on our own. Our new store banners and recent acquisitions have further enabled us to achieve cost efficiencies in direct importing, freight consolidation and general administration expenses while enabling us to share our specialized retail knowledge and ideas among our retail, wholesale and support service groups.

CONVERSION TO A SHARE CORPORATION

On January 1, 2011, the North West Company Fund (the “Fund”) completed its previously announced conversion to a corporation named The North West Company Inc. (the “Company”) by way of a plan of arrangement under section 192 of the Canada Business Corporations Act. Unitholders of the Fund received one common share of the Company for each unit of the Fund held. Upon conversion, the Company assumed all of the covenants and obligations of the Fund and the common shares of the Company began trading on the Toronto Stock Exchange under the symbol “NWC”. The details of the conversion and the Arrangement are contained in the management information circular dated April 29, 2010 which is available on the Company’s website at www.northwest.ca or on SEDAR at www.sedar.com.

The conversion was accounted for as a continuity of interests and as such the carrying amounts of the assets, liabilities and unitholders’ equity in the consolidated financial statements of the Fund immediately before the conversion was the same as the carrying values of the Company immediately after the conversion. The comparative amounts in this MD&A and in the consolidated financial statements are those of the Fund restated to conform with IFRS. The MD&A and consolidated financial statements contain references to “shareholders”, “shares” and “dividends” which were previously referred to as “unitholders”, “units” and “distributions” under the Fund.

As a result of the conversion to a share corporation, the earnings from The North West Company LP that previously flowed to the Fund on a pre-tax basis are now subject to income taxes based on statutory federal and provincial income tax rates commencing January 1, 2011.

On November 21, 2011, income tax legislation was enacted to curtail income deferral by corporations with a partnership that has a different taxation year. The new legislation requires income from these partnerships to be reported on an accrual basis for tax purposes but also includes transitional provisions whereby income earned from the partnership during the initial adoption year can be deferred and recognized over a subsequent five-year period. As a result of these transition rules, a substantial portion of the income tax payable of the Canadian Operations for 2011 has been deferred and will be paid over the next five years. This deferred tax liability has been recorded as a reduction of deferred tax assets. Further information on deferred tax assets and deferred tax liabilities is provided in Note 9 to the consolidated financial statements.

FISCAL YEAR

The fiscal year ends on January 31. The 2012 year which ended January 31, 2013 had 366 days of operations as a result of February 29th. The first quarter had 90 days of operations compared to 89 days of operations in the first quarter of 2011. The estimated impact of the extra day has been deducted from 2012 same store sales.

Consolidated Results

2012 Highlights

- Sales increased to \$1.514 billion, our 13th consecutive year of sales growth.
- Net earnings increased 12.4% to \$65.1 million.
- Cash flow from operating activities increased 11.7% to \$129.0 million and has grown 8.1% on a compound annual basis over the past 10 years.
- Quarterly dividends to shareholders increased 8.3% to \$0.26 per share.
- Return on average equity was 22.5%, our seventh consecutive year greater than 20.0%.
- Return on net assets was 20.7% compared to 18.5% in 2011.
- Debt-to-equity improved to .55:1.
- Total returns to shareholders were 25.1% for the year and were 11.8% on a compound annual basis over the past five years.

FINANCIAL PERFORMANCE

Some of the key performance indicators used by management to assess results are summarized in the following table:

Key Performance Indicators

(\$ in thousands, except per share/unit)	2012	2011	2010
Sales	\$ 1,513,646	\$ 1,495,136	\$ 1,448,104
Same store sales % increase ⁽¹⁾	0.5%	3.3%	2.7%
Trading profit ⁽²⁾ (EBITDA)	\$ 134,267	\$ 125,881	\$ 125,764
EBIT ⁽²⁾	\$ 97,118	\$ 89,309	\$ 90,272
Net earnings ⁽³⁾	\$ 65,148	\$ 57,961	\$ 69,656
Net earnings per share/unit - basic ⁽³⁾	\$ 1.35	\$ 1.20	\$ 1.45
Net earnings per share/unit - diluted ⁽³⁾	\$ 1.34	\$ 1.19	\$ 1.44
Cash dividends/distributions per share/unit ⁽³⁾	\$ 1.04	\$ 1.05	\$ 1.42
Total assets	\$ 651,394	\$ 626,917	\$ 616,588
Total long-term liabilities	\$ 164,960	\$ 215,206	\$ 144,736
Return on net assets ⁽²⁾	20.7%	18.5%	17.9%
Return on average equity ^{(2),(3)}	22.5%	20.1%	24.1%

(1) All references to same store sales excludes the foreign exchange impact

(2) See Non-GAAP financial measures section on page 24

(3) Effective January 1, 2011 ("2010"), North West Company Fund converted to a share corporation called The North West Company Inc. Information on the impact of the conversion is provided in net earnings on page 8, return on average equity on page 9 and shareholder dividends and unitholder distributions on page 13.

Consolidated Sales Sales for the year ended January 31, 2013 ("2012") increased 1.2% to \$1.514 billion compared to \$1.495 billion for the year ended January 31, 2012 ("2011"), and were up 4.5% compared to \$1.448 billion for the year ended January 31, 2011 ("2010"). Sales for the year were negatively impacted by store closures in the Canadian Operations partially offset by one extra day of operations as a result of February 29th and the foreign exchange impact on the translation of U.S. denominated sales in the International Operations. Excluding the foreign exchange impact, sales increased 1.0% from 2011 and were up 5.5% from 2010. On a same store basis, sales increased 0.5% compared to increases of 3.3% in 2011 and 2.7% in 2010.

Food sales increased 1.8% from 2011, and were up 1.6% excluding the foreign exchange impact led by sales growth in our Canadian Operations. Continued improvement in our in-stock performance and a focus on higher growth food product categories in our northern Canada stores contributed to the sales growth. Same store food sales increased 1.4% over last year with quarterly same store increases of 2.8%, 2.0%, 1.0% and 0.6% in the fourth quarter. Canadian food sales increased 1.9% and International food sales were up 1.0% excluding the foreign exchange impact.

General merchandise sales decreased 2.1% compared to 2011 and were down 2.2% excluding the foreign exchange impact. Same store general merchandise sales decreased by 3.1% for the year with an increase of 4.7% in the first quarter and decreases of 0.8%, 5.8% and 6.8% in the last three quarters of the year. General merchandise sales were weak across all of our banners due to lower spending in discretionary categories such as electronics and home furnishings and a weaker assortment in other categories.

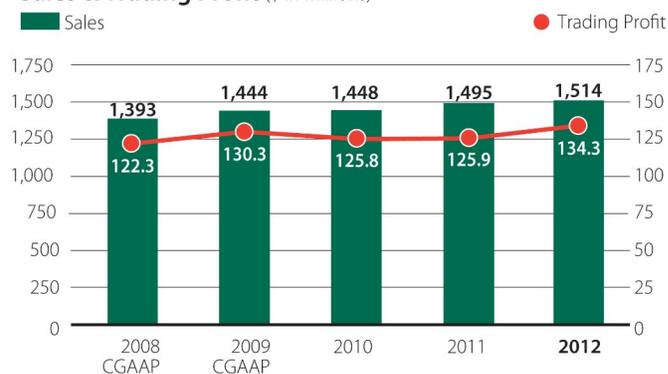

Other revenue, which includes fuel, fur and service charge revenue, increased 7.5% compared to 2011 largely due to fuel market share gains and inflation.

Sales Blend The table below shows the consolidated sales blend over the past three years:

	2012	2011	2010
Food	76.8%	76.4%	76.4%
General merchandise	19.5%	20.2%	20.3%
Other	3.7%	3.4%	3.3%

Canadian Operations accounted for 68.9% of total sales (68.8% in 2011 and 67.6% in 2010) while International Operations contributed 31.1% (31.2% in 2011 and 32.4% in 2010).

Sales & Trading Profit (\$ in millions)

Gross Profit Gross profit increased 3.9% to \$444.7 million compared to \$428.0 million last year driven by sales growth and a 75 basis points improvement in the gross profit rate. The gross profit rate was 29.38% compared to 28.63% last year as food gross profit rate improvements in both Canadian and International Operations more than offset lower general merchandise gross profit rates. Food gross profit rate gains were largely due to better buying and inventory management, favourable changes in product mix and improved perishable category performance.

Selling, operating and administrative expenses Selling, operating and administrative expenses ("expenses") increased 2.6% to \$347.6 million and increased 31 basis points as a percentage of sales compared to last year. The most significant factor was a \$3.7 million increase in share-based compensation costs largely due to a higher share price compared to last year. The share price increased \$3.74 per share or

19.3% to \$23.14 at January 31, 2013 compared to \$19.40 at January 31, 2012. Additional information on share-based compensation is provided in Note 13 to the consolidated financial statements. Costs related to store closures in the Canadian Operations and higher utility costs and employee medical insurance expenses in the International Operations also contributed to the increase in expenses.

Earnings from operations (EBIT) Earnings from operations or earnings before interest and income taxes ("EBIT") increased 8.7% to \$97.1 million compared to \$89.3 million last year as sales growth and gross profit rate improvements more than offset higher selling, operating and administrative expenses. Excluding the foreign exchange impact, earnings from operations increased \$7.7 million or 8.6% compared to last year. Trading profit or earnings before interest, income taxes, depreciation and amortization ("EBITDA") of \$134.3 million increased 6.7% compared to last year. Excluding the foreign exchange impact, trading profit increased 6.5% and was 8.9% as a percentage to sales compared to 8.4% last year.

Interest expense Interest expense decreased 3.6% to \$5.8 million compared to \$6.0 million last year. The decrease in interest expense is largely due to the capitalization of interest on construction projects. An increase in the average cost of borrowing to 3.5% compared to 3.2% in 2011 was partially offset by a 6.4% decrease in average debt levels compared to last year. Further information on interest expense is provided in Note 18 to the consolidated financial statements.

Income tax expense The provision for income taxes increased to \$26.2 million compared to \$25.3 million last year and the effective tax rate for the year was 28.7% compared to 30.4% last year reflecting an increase in earnings in the Canadian Operations and lower earnings in the International Operations. The decrease in the effective tax rate is due to lower statutory income tax rates in Canada and the impact of income earned across the various tax jurisdictions in the International Operations. A more detailed explanation of the income tax provision and deferred tax assets is provided in Note 9 to the consolidated financial statements.

Trading Profit & Net Earnings (\$ in millions)

Net earnings Consolidated net earnings increased 12.4% to \$65.1 million or \$1.34 per share on a diluted basis compared to \$58.0 million or \$1.19 per share in 2011. The increase in Canadian earnings from operations combined with lower income tax rates in Canada more than offset lower earnings in the International Operations. Additional information on the financial performance of Canadian Operations and International Operations is included on page 9 and page 11 respectively. In 2012, the average exchange rate used to translate U.S. denominated sales and expenses from the International Operations was relatively flat at 0.998 compared to 0.991 last year.

The Canadian dollar's depreciation versus the U.S. dollar in 2011 had the following net impact on the 2012 results:

Sales.....increase of \$3.1 million or 0.2%
 Earnings from operations.....increase of \$0.1 million
 Net earnings.....increase of \$0.1 million
 Diluted earnings per share.....\$0.00 per share

The decrease in net earnings from 2008 to 2010 compared to 2011 and 2012 performance as shown in the preceding graph is largely due to the conversion to a share corporation and the taxation of earnings in the Canadian Operations. Prior to the conversion to a share corporation on January 1, 2011, earnings from The North West Company LP flowed to North West Company Fund on a pre-tax basis and were fully distributed to unitholders. There was no income tax payable by the Fund on these distributions. See Conversion to a Share Corporation on page 6 for further information.

Although the Company was structured as an income trust for most of 2010, the application of different tax rates used to calculate deferred tax assets and liabilities for income trusts under IFRS compared to CGAAP resulted in an increase in the income tax provision from \$7.3 million under CGAAP to \$14.5 million under IFRS. This change in income tax expense was the primary reason for the decrease in 2010 net earnings reported under IFRS compared to 2009 net earnings reported under CGAAP.

Total Assets Consolidated assets increased 3.9% to \$651.4 million compared to \$626.9 million in 2011 and were up 5.6% compared to \$616.6 million in 2010. The increase in consolidated assets is largely due to higher property and equipment and intangible assets compared to last year and 2010 and an increase in deferred tax assets compared to last year. The increase in property and equipment is due to investments in new stores, major store renovations, improvements to staff housing and equipment replacements. The increase in intangible assets is primarily due to the development of a transportation management system and an upgrade to the Company's financial management system. Deferred tax assets have increased compared to last year mainly due to tax assets related to property and equipment and share-based compensation.

Consolidated working capital for the past three years is summarized in the following table:

(\$ in thousands)	2012	2011	2010
Current assets	\$ 303,896	\$ 295,836	\$ 284,789
Current liabilities	\$ (190,184)	\$ (128,002)	\$ (185,377)
Working capital	\$ 113,712	\$ 167,834	\$ 99,412

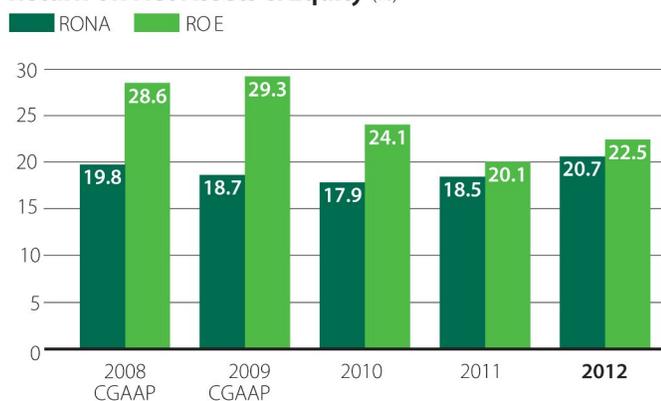

Working capital decreased \$54.1 million or 32.2% to \$113.7 million compared to 2011 and was up \$14.3 million or 14.4% compared to 2010. The decrease in working capital compared to 2011 is primarily due to an increase in current liabilities largely related to the current portion of long-term debt and income tax payable. The current portion of long-term debt increased to \$40.4 million compared to \$0.6 million in 2011 but was down compared to \$68.3 million in 2010 as a result of the timing of the maturity of loan facilities. See Note 11 to the consolidated financial statements for further information on long-term debt. The increase in income tax payable is due to the conversion from an income trust to a share corporation on January 1, 2011 and the resulting taxation of Canadian earnings.

Return on net assets employed increased to 20.7% from 18.5% in 2011, and return on average equity increased to 22.5% from 20.1% in 2011. Return on net assets increased due to a 8.7% increase in earnings before interest and taxes and lower average net assets employed.

Additional information on net assets employed for the Canadian and International Operations is on page 10 and page 12 respectively.

Return on average equity improved to 22.5% due to a 12.4% increase in net earnings partially offset by an increase in average equity compared to last year. The decrease in the return on average equity from 2008 to 2010 compared to 2011 and 2012 as shown in the graph below is largely due to the conversion to a share corporation and the taxation of earnings in the Canadian Operations as previously noted. Further information on shareholder's equity is provided in the statements of changes in shareholders' equity in the consolidated financial statements.

Return on Net Assets & Equity (%)

Total long-term liabilities Consolidated long-term liabilities decreased \$50.2 million or 23.3% to \$165.0 million from 2011 and were up \$20.2 million or 14.0% compared to 2010. The decrease in long-term liabilities from 2011 is largely due to an increase in the current portion of long-term debt related to the International Operations loan facilities that mature December 31, 2013. Further information on long-term debt is included in the sources of liquidity and capital structure sections on page 14 and page 15 respectively and in Note 11 to the consolidated financial statements.

The increase in long-term liabilities compared to 2010 is due to an increase in the defined benefit plan obligation largely related to a significant decrease in the discount rate used to calculate pension liabilities. The defined benefit obligation increased \$19.4 million to \$28.4 million compared to \$9.0 million in 2010. Further information on post-employment benefits is provided in Note 12 to the consolidated financial statements.

Canadian Operations

FINANCIAL PERFORMANCE

Canadian Operations results for the year are summarized by the key performance indicators used by management as follows:

Key Performance Indicators

(\$ in thousands)	2012	2011	2010
Sales	\$ 1,043,050	\$ 1,028,396	\$ 978,662
Same store sales % increase	1.0%	3.7%	4.1%
Trading profit ⁽¹⁾ (EBITDA)	\$ 107,060	\$ 97,998	\$ 98,781
Earnings from operations ⁽¹⁾ (EBIT)	\$ 77,905	\$ 69,253	\$ 71,270
Return on net assets ⁽¹⁾	25.0%	20.7%	20.2%

(1) See Non-GAAP financial measures section on page 24

Sales Canadian Operations sales increased \$14.7 million or 1.4% to \$1.043 billion compared to \$1.028 billion in 2011, and were up \$64.4 million or 6.6% compared to 2010. Same store sales increased 1.0% compared to a 3.7% increase in 2011. Food sales accounted for 72.2% (71.8% in 2011) of total Canadian sales. The balance was made up of general merchandise sales at 23.0% (23.6% in 2011) and other sales, which consists primarily of fuel sales and service charge revenue at 4.8% (4.6% in 2011).

Food sales increased by 1.9% over 2011 and were up 7.1% compared to 2010. Same store food sales increased 2.0% compared to 3.8% in 2011. Same store food sales had quarterly increases of 4.2%, 3.0%, 1.1% and 0.7%. Strong food sales growth in our northern markets due in part to product assortment changes and continued improvement in our in-stock rates more than offset lower sales in less remote stores. Food sales in stores impacted by the Nutrition North Canada ("NNC") freight subsidy had the largest increases building on the sales growth in 2011. The Company continued to review its supply chain network in an effort to reduce transportation costs to the north. In September 2012, the Company began to air freight merchandise directly to Baffin Island from its distribution center in Winnipeg. The savings from this initiative were invested in price reductions of 15% or more on 175 key products sold in the Company's stores located on Baffin Island which also contributed to the sales gain. Food inflation resulting from higher commodity costs net of NNC freight subsidies was approximately 1%.

General merchandise sales decreased 1.2% from 2011 but were up 3.3% compared to 2010. Same store sales decreased 2.2% compared to a 3.3% increase in 2011. On a quarterly basis, same store sales increased 6.3% in the first quarter followed by decreases of 0.3% in the second quarter and 5.4% in the last two quarters of the year. Sales were negatively impacted by assortment challenges and lower discretionary spending on electronics, home furnishings and other hardlines categories.

Other revenues, which include fuel, fur and service charge revenue, were up 7.9% from 2011 and increased 15.3% over 2010. The increase in other revenues is largely due to fuel market share gains and inflation.

Sales Blend The table below shows the sales blend for the Canadian Operations over the past three years:

	2012	2011	2010
Food	72.2%	71.8%	71.8%
General merchandise	23.0%	23.6%	23.7%
Other	4.8%	4.6%	4.5%

Same Store Sales Canadian Operations have consistently achieved upper-quartile same store food sales reflecting the Company's focus on superior food selling execution within what are generally growing and younger markets with stable base income profiles. Same store general merchandise sales have been more volatile because they are heavily weighted to big-ticket durable goods that depend upon customers' discretionary income. Same store sales for the past three years are shown in the following table:

Same Store Sales

(% change)	2012	2011	2010
Food	2.0%	3.8%	4.6%
General merchandise	(2.2)%	3.3%	2.6%
Total sales	1.0%	3.7%	4.1%

Gross Profit Gross profit dollars for Canadian Operations increased by 5.0% driven by sales growth and improvement in gross profit rates. The higher gross profit rates were due to product assortment changes, better buying and inventory management, improved perishable category profitability, and reduced pricing pressure in select southern markets compared to last year. Higher gross profit rates on gasoline was also a factor. Partially offsetting these improvements were higher markdowns to clear slow moving general merchandise in northern markets.

Selling, operating and administrative expenses Selling, operating and administrative expenses (“expenses”) increased 2.9% from 2011 and were up 32 basis points as a percentage of sales compared to last year. Higher share-based compensation costs related to an increase in share price compared to last year as noted under the consolidated financial results was the largest factor contributing to the increase in expenses. A \$1.3 million loss on the closure of six Giant Tiger stores and higher pension costs were also factors. Excluding the Giant Tiger store closure loss, expenses increased 20 basis points as a percentage of sales.

Earnings from operations (EBIT) Earnings from operations increased \$8.7 million or 12.5% to \$77.9 million compared to \$69.3 million in 2011 as sales growth and an improvement in gross profit rates more than offset higher expenses. Trading profit from Canadian Operations increased \$9.1 million or 9.2% to \$107.1 million and was 10.3% as a percentage of sales compared to 9.5% in 2011. Excluding the Giant Tiger store closure loss, trading profit increased 10.6% and was 10.4% as a percentage of sales.

Canadian EBIT & Trading Profit Margins (% of sales)

Net Assets Employed Net assets employed at January 31, 2013, decreased 7.5% to \$291.9 million compared to \$315.5 million at January 31, 2012, as summarized in the following table:

(\$ in millions at the end of the fiscal year)	2012	2011	2010
Property and equipment	\$ 190.8	\$ 196.1	\$ 189.6
Inventory	124.2	131.3	126.2
Accounts receivable	60.0	66.6	61.1
Other assets	70.0	49.9	58.9
Liabilities	(153.1)	(128.4)	(104.9)
Net Assets Employed	\$ 291.9	\$ 315.5	\$ 330.9

Property and equipment decreased compared to 2011 largely due to the Giant Tiger store closures. Capital expenditures for the year included new stores, store replacements and major store renovation projects, staff housing renovations and energy-efficient refrigeration upgrades.

Inventory decreased due to the store closures, merchandise assortment reviews and a greater focus on inventory productivity. Average inventory levels in 2012 were \$4.1 million or 3.1% lower than 2011 and \$3.0 million or 2.3% lower than 2010 due to store closures and changes in merchandise assortments. Inventory turnover improved to 5.7 times from 5.5 times in 2011 and 5.2 times in 2010.

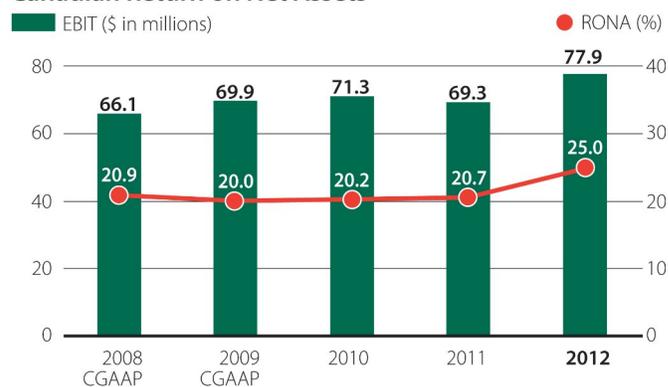

Accounts receivable decreased \$6.6 million or 9.9% from 2011 and average accounts receivable were \$0.6 million or 1.0% lower than 2011. The decrease in accounts receivable is due to lower customer demand for big-ticket merchandise, the timing of collections and a decrease in an insurance related accounts receivable resulting from stores destroyed by fire in 2011.

Other assets increased \$20.1 million or 40.3% compared to last year and were up \$11.1 million or 18.9% compared to 2010 largely due to an increase in cash, intangible assets and deferred tax assets. The increase in cash is due to deposits in-transit at year-end and higher cash balances to support our financial services business. Intangible assets increased compared to last year and 2010 largely due to investments in the development of a transportation management system and an upgrade of the Company's financial management system. Deferred tax assets have increased compared to last year mainly due to tax assets related to property and equipment and share-based compensation. Further information on deferred tax assets and deferred tax liabilities is provided in Note 9 to the consolidated financial statements.

Liabilities increased \$24.7 million or 19.2% from 2011 and were up \$48.2 million or 45.9% compared to 2010 primarily due to higher accounts payable and accrued liabilities, income tax payable and defined benefit plan obligations. Accounts payable and accrued liabilities increased due to higher trade accounts payable related to the timing of payments and higher accrued incentive plan expenses compared to 2010. Income tax payable increased \$15.0 million over 2011 and \$18.3 million over 2010 due to the conversion from an income trust to a share corporation and the timing of income tax installment payments. Further information on the Conversion to a Share Corporation is provided on page 6. The defined benefit plan obligation increased \$0.8 million to \$28.4 million compared to 2011 and was up \$19.4 million compared to \$9.0 million in 2010 largely due to a significant decrease in the discount rate used to calculate pension liabilities. Further information on post-employment benefits is provided in Note 12 to the consolidated financial statements.

Return on Net Assets The return on net assets employed for Canadian Operations improved to 25.0% from 20.7% in 2011 due to a 12.5% increase in EBIT and the impact of lower average net assets compared to last year as noted above.

Canadian Return on Net Assets

International Operations

(Stated in U.S. dollars)

International Operations include Alaska Commercial Company ("AC"), Cost-U-Less ("CUL") and Pacific Alaska Wholesale ("PAW").

FINANCIAL PERFORMANCE

International Operations results for the year are summarized by the key performance indicators used by management as follows:

Key Performance Indicators

(\$ in thousands)	2012	2011	2010
Sales	\$ 471,728	\$ 470,932	\$ 457,590
Same store sales % increase (decrease)	(0.6)%	2.3%	(0.2)%
Trading profit ⁽¹⁾ (EBITDA)	\$ 27,273	\$ 28,133	\$ 26,302
Earnings from operations ⁽¹⁾ (EBIT)	\$ 19,259	\$ 20,236	\$ 18,522
Return on net assets ⁽¹⁾	12.1 %	13.6%	12.6 %

(1) See Non-GAAP financial measures section on page 24

Sales International sales increased 0.2% to \$471.7 million compared to \$470.9 million in 2011, and were up 3.1% compared to 2010 as food sales growth was largely offset by lower general merchandise sales. Same store sales decreased 0.6% compared to a 2.3% increase in 2011 and a 0.2% decrease in 2010. Food sales accounted for 87.1% (86.3% in 2011) of total sales with the balance comprised of general merchandise at 11.8% (12.6% in 2011) and other sales, which consist primarily of fuel sales and service charge revenues, at 1.1% (1.1% in 2011).

Food sales increased 1.0% from 2011 and were up 4.4% compared to 2010. Same store food sales were up 0.3% compared to a 2.9% increase in 2011. Quarterly same store food sales increases were 0.1%, 0.2%, 0.6% and 0.3%. Our CUL stores and PAW business were the primary contributors to the sales growth. CUL provided food sales growth throughout the year, building on the same store sales gains in 2011. The PAW business also delivered another year of sales growth as it continues to recapture market share after a significant sales decrease in 2010.

General merchandise sales decreased 6.1% from 2011 and were down 6.6% from 2010. On a same store basis, general merchandise sales were down 6.8% compared to a decrease of 1.8% in 2011. Quarterly same store sales were down 2.0%, 2.8% and 7.5% in the first three quarters and decreased 12.6% in the fourth quarter compared to a 7.1% increase in the fourth quarter last year. Lower discretionary spending due to a weak economic environment, high unemployment levels and increases in energy-related living expenses negatively impacted sales, particularly in electronics, transportation, furniture and seasonal merchandise. In Alaska, a decrease in the Permanent Fund Dividend ("PFD"), regional native corporation dividends, and claims settlement payments were also factors. The PFD paid to qualifying Alaskan residents decreased 25.2% to \$878 compared to \$1,174 last year and \$1,281 in 2010.

Other revenues, which consist of fuel and service charge revenue, were up 3.3% from 2011 and were up 16.0% from 2010 primarily due to fuel inflation.

Sales Blend The table below reflects the growing ratio of food sales to the total sales of International Operations:

	2012	2011	2010
Food	87.1%	86.3%	85.9%
General merchandise	11.8%	12.6%	13.1%
Other	1.1%	1.1%	1.0%

Same store sales International Operations same store sales for the past three years are shown in the following table. General merchandise same store sales are significantly impacted by consumer spending on big-ticket durable goods that are largely influenced by the previously mentioned special payments, such as the Permanent Fund Dividend, which can result in greater sales volatility.

Same store sales

(% change)	2012	2011	2010
Food	0.3 %	2.9 %	(0.1)%
General merchandise	(6.8)%	(1.8)%	(1.0)%
Total sales	(0.6)%	2.3 %	(0.2)%

Gross Profit Gross profit dollars increased 0.4% reflecting sales growth and a slight improvement in gross profit rate from 2011. An increase in food gross profit rates, resulting in part from improved execution in perishable departments, was largely offset by higher markdowns to clear slow-moving general merchandise and prepare for the repositioning of merchandise assortments in select store locations.

Selling, operating and administrative Selling, operating and administrative expenses ("expenses") increased 1.5% over last year and were up 28 basis points as a percentage of sales. Higher employee medical insurance and utility costs were the leading factors contributing to the increase in expenses. These two factors combined increased \$1.7 million or 9.1% compared to 2011 and were up \$3.6 million or 21.0% over 2010. Partially offsetting these costs, were lower incentive plan expenses compared to last year.

Earnings from operations (EBIT) Earnings from operations decreased \$1.0 million or 4.8% to \$19.3 million compared to \$20.2 million in 2011 as higher expenses were only partially offset by an increase in gross profit. Trading profit decreased \$0.9 million or 3.1% to \$27.3 million and was 5.8% as a percentage of sales compared to 6.0% in 2011.

International EBIT & Trading Profit Margins (% of sales)

Net Assets Employed International Operations net assets employed increased \$24.4 million or 17.0% to \$167.8 million compared to \$143.4 million in 2011 and were up \$19.8 million or 13.4% from 2010 as summarized in the following table:

Net Assets Employed

(\$ in millions at the end of the fiscal year)	2012	2011	2010
Property and equipment	\$ 83.3	\$ 73.9	\$ 69.9
Inventory	63.1	54.5	50.7
Accounts receivable	10.1	9.9	9.1
Other assets	50.2	43.7	50.8
Liabilities	(38.9)	(38.6)	(32.5)
Total	\$ 167.8	\$ 143.4	\$ 148.0

Property and equipment increased reflecting a store replacement, energy-efficient refrigeration upgrades, and the substantial completion of construction of a new Cost-U-Less store in Barbados that opened on February 23, 2013.

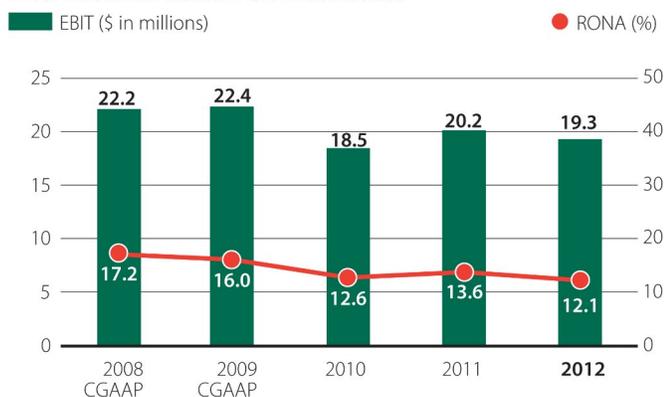

Inventories increased compared to last year and 2010 largely due to additional food inventory related to a focus on in-stock rates and the new store in Barbados. Commodity cost increases were also a factor. Average inventory levels in 2012 were \$2.7 million or 4.8% higher than 2011 and up \$4.4 million or 8.0% compared to 2010. Inventory turnover decreased to 6.0 times in 2012 compared to 6.2 times in 2011.

Other assets increased \$6.5 million or 14.9% compared to last year largely due to higher cash balances at the end of the year and an increase in deferred tax assets.

Liabilities were consistent with 2011 but increased compared to 2010 due primarily to higher trade accounts payable.

Return on Net Assets The return on net assets employed for International Operations decreased to 12.1% from 13.6% in 2011 due to lower EBIT and higher average net assets employed as noted above.

International Return on Net Assets

Consolidated Liquidity and Capital Resources

The following table summarizes the major components of cash flow:

(\$ in thousands)	2012	2011	2010
Cash flows from (used in):			
Operating activities	\$ 128,992	\$ 115,469	\$ 114,564
Investing activities	\$ (48,781)	\$ (45,948)	\$ (34,124)
Financing activities	\$ (68,520)	\$ (73,768)	\$ (76,487)
Net change in cash	\$ 11,691	\$ (4,247)	\$ 3,953

Cash from operating activities Cash flow from operating activities increased 11.7% to \$129.0 million. Changes in non-cash working capital positively impacted cash flow from operating activities by \$10.8 million compared to a decrease in cash flow of \$3.0 million in 2011. The change in non-cash working capital is largely due to a decrease in accounts receivable and an increase in accounts payable as noted in the Canadian and International net assets employed on pages 10 and 12 respectively.

The Company paid income taxes of \$15.5 million compared to \$6.2 million in 2011. Following the conversion to a share corporation on January 1, 2011 and the deferral of the payment of Canadian income taxes in the transition year in accordance with income tax legislation enacted November 21, 2011, the Company began paying Canadian income tax installments in 2012. The remaining balance of the accrued Canadian income taxes for 2012 of approximately \$19 million will be paid in the first quarter of 2013. The Company expects its Canadian monthly tax installments to increase in 2013 based on a normalized level of taxable income and the recognition of a portion of the deferred taxable income from the transition year. Further information on the Conversion to a Share Corporation is provided on page 6.

Cash flow from operating activities and unutilized credit available on existing loan facilities are expected to be sufficient to fund operating requirements, pension plan contributions, and planned growth-related capital expenditures as well as anticipated dividends during 2013.

The compound annual growth rate ("CAGR") for cash flow from operating activities over the past 10 years is 8.1% as shown in the following graph:

(1) 2011 and 2012 are reported in accordance with IFRS. 2010 has been restated to IFRS. All other historical financial information was prepared in accordance with CGAAP and has not been restated to IFRS.

Cash used in investing activities Net cash used in investing activities was \$48.8 million compared to \$45.9 million in 2011. Net investing in Canadian Operations was \$31.7 million (\$34.3 million in 2011). A summary of the Canadian Operations investing activities is included in net assets employed on page 10. Net investing in International Operations was \$17.1 million compared to \$11.6 million in 2011. A summary of the International Operations investing activities is included in net assets employed on page 12.

The following table summarizes the number of stores and selling square footage under NWC's various retail banners at the end of the fiscal year:

	Number of Stores		Selling square footage	
	2012	2011	2012	2011
Northern	121	123	681,456	690,921
NorthMart	7	7	148,306	148,306
Quickstop	16	15	27,999	26,566
Giant Tiger	31	36	494,057	577,432
AC Value Centers	30	30	300,882	295,742
Cost-U-Less	12	12	336,138	336,138
Other Formats	6	6	45,716	45,716
Total at year-end	223	229	2,034,554	2,120,821

In the Canadian Operations, a new QuickStop convenience store was opened in Rankin Inlet, Nunavut and a Giant Tiger store was opened in Swift Current, Saskatchewan. New Northern stores were opened in Taloyoak, Nunavut and Oxford House, Manitoba, replacing existing facilities and two Northern stores and six underperforming Giant Tiger stores were closed. Total selling square feet in Canada decreased to 1,374,647 from 1,466,054 in 2011.

In the International Operations, a new AC Value Center was opened in Emmonak, Alaska replacing an existing facility. International selling square feet increased to 659,907 from 654,767 in 2011.

Cash used in financing activities Cash used in financing activities was \$68.5 million compared to \$73.8 million in 2011. The decrease is mainly related to a change in amounts drawn on the loan facilities and the repayment of a US\$3.9 million note payable in the International Operations last year. Further information on the loan facilities is provided in the Sources of Liquidity section below.

Shareholder Dividends / Unitholder Distributions The Company paid dividends of \$50.3 million or \$1.04 per share compared to \$50.8 million or \$1.05 per share paid in 2011, including the final distribution from the Fund. Excluding the final distribution from the Fund, the quarterly dividend increased 8.3% from 2011. In 2010, the last year under the income trust structure, the Fund paid distributions of \$68.7 million or \$1.42 per unit. The decrease in dividends in 2012 and 2011 compared to the distributions paid in 2010 is due to the conversion to a share corporation and the taxation of earnings of the Canadian Operations. Prior to the conversion to a share corporation, earnings from The North West Company LP flowed to the Fund on a pre-tax basis and were distributed to unitholders. While higher corporate taxes have reduced the Company's net earnings and cash available for dividends to shareholders, the after-tax impact on personal income is largely offset for taxable Canadian investors due to the dividend tax credit.

The following table shows the quarterly cash dividends per share and distributions per unit paid for the past three years:

	Dividends	Dividends	Distributions
	2012	2011	2010
First Quarter	\$ 0.26	\$ 0.24	\$ 0.34
Second Quarter	0.26	0.24	0.34
Third Quarter	0.26	0.24	0.34
Fourth Quarter	0.26	0.24	0.34
Special distribution	—	0.09	0.06
Total	\$ 1.04	\$ 1.05	\$ 1.42

The payment of dividends on the Company's common shares is subject to the approval of the Board of Directors and is based on, among other factors, the financial performance of the Company, its current and anticipated future business needs and the satisfaction of solvency tests imposed by the Canada Business Corporations Act ("CBCA") for the declaration of dividends. The dividends were designated as eligible dividends in accordance with the provisions of the Canadian Income Tax Act.

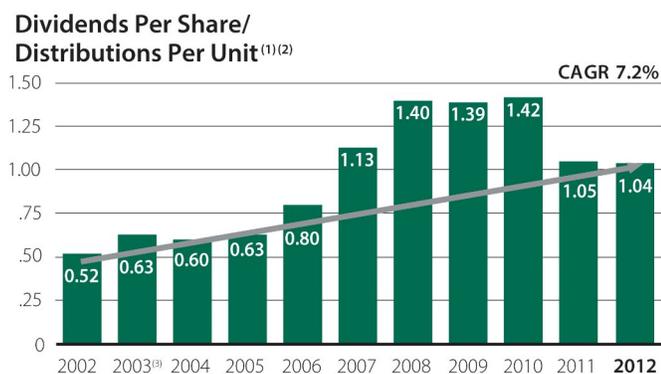

The determination to declare and make payable distributions from the Fund was subject to the terms of the Fund's Declaration of Trust and the discretion of the Board of Trustees. The Fund's distribution policy was to make distributions to unitholders equal to the taxable income of the Fund. The taxable income of the Fund was primarily based on an allocation of the taxable income of The North West Company LP less Fund expenses. In addition to the quarterly distributions, a special year-end distribution was declared to unitholders if the taxable income of the Fund exceeded the cumulative distributions for the year. A special distribution of \$0.09 per unit was paid February 18, 2011 to unitholders of record on December 31, 2010. The Fund's obligation to pay the \$0.09 per unit special distribution was assumed by the Company as part of the conversion to a share corporation (see Conversion to a Share Corporation on page 6). Further information on dividends is included in Note 19 to the consolidated financial statements.

The following table shows dividends and distributions paid in comparison to cash flow from operating activities for the past three years:

	2012	2011	2010
Dividends/Distributions	\$ 50,320	\$ 50,797	\$ 68,700
Cash flow from operating activities	\$128,992	\$115,469	\$114,564
Dividends/Distributions as a % of cash flow from operating activities	39.0%	44.0%	60.0%

The decrease in dividends as a percentage of cash flow from operating activities to 39.0% compared to 2010 is largely due to the conversion to a share corporation and the taxation of earnings in the Canadian Operations. The Canadian Operations began paying income tax installments in 2012 which has reduced cash flow from operating activities. The Company's income tax payments will increase in 2013 based on the payment of the remaining accrued income taxes for 2012 and higher Canadian monthly tax installments based on a normalized level of taxable income. Further information is provided under cash flow from operating activities on page 12.

The compound annual growth rate (CAGR) for dividends and distributions over the past 10 years is 7.2% as shown in the following graph:

(1) All per unit information has been restated to reflect the three-for-one unit split that occurred on September 20, 2006.

(2) From 2002 to 2010, amounts paid to unitholders were distributions from the Fund. The Fund converted to a share corporation effective January 1, 2011. The \$1.05 paid to shareholders in 2011 includes a \$0.09 per unit final distribution from the Fund paid by the Company as part of the conversion to a share corporation plus dividends of \$0.96 per share.

(3) The Fund paid a special distribution of \$0.11 per unit on a split adjusted basis.

Subsequent event - dividends On March 14, 2013, the Board of Directors approved a quarterly dividend of \$0.28 per share to shareholders of record on March 28, 2013, to be paid on April 15, 2013. This is an increase of \$0.02 per share or 7.7% compared to the \$0.26 per share quarterly dividend paid in 2012. On an annual basis, the Company anticipates paying dividends of approximately \$1.12 per share compared to \$1.04 per share in 2012.

Post-employment benefits The Company sponsors defined benefit and defined contribution pension plans covering the majority of Canadian employees. Effective January 1, 2011, the Company entered into an amended and restated staff pension plan, which incorporated legislated changes, administrative practice, and added a defined contribution provision. Under the amended pension plan, all members who did not meet a qualifying threshold based on number of years in the pension plan and age were transitioned to the defined contribution pension plan effective January 1, 2011 and no longer accumulate years of service under the defined benefit pension plan. The defined benefit pension previously earned by the members transitioned to the defined contribution plan will continue to accrue in accordance with the provisions of the amended plan based on the member's current pensionable earnings. Members who met the required qualifying threshold elected between continuing to accrue a defined benefit pension and accruing a defined contribution benefit.

As a result of further reductions in already low long-term interest rates, the Company recorded net actuarial losses on defined benefit pension plans of \$2.6 million net of deferred income taxes in other comprehensive income compared to net actuarial losses of \$15.3 million net of deferred income taxes in 2011. The charge to other comprehensive income was immediately recognized in retained earnings. The actuarial loss in 2012 was due to a decrease in the discount rate used to calculate pension liabilities from 4.5% in 2011 to 4.3% in 2012. The net actuarial loss in 2011 was due to a decrease in the discount rate from 5.8% in 2010 to 4.5% in 2011 and lower than expected return on pension plan assets.

In 2013, the Company will be required to contribute approximately \$7.2 million to the defined benefit pension plan of which approximately \$3.9 million of this obligation may be settled by the issuance of a letter of credit in accordance with pension legislation. The cash contribution to the pension plan is expected to be approximately \$3.3 million in 2013 compared to \$5.6 million in 2012. The actual amount of the contributions may be different from the estimate based on actuarial valuations, plan investment performance, volatility in discount rates, regulatory requirements and other factors. The Company also expects to contribute approximately \$2.2 million to the defined contribution pension plan in 2013 compared to \$2.0 million in 2012. Additional information regarding post-employment benefits is provided in Note 12 to the consolidated financial statements.

Sources of liquidity The Canadian Operations have available committed, extendible, revolving loan facilities of \$170.0 million that mature on December 31, 2015. These facilities are secured by a floating charge on the assets of the Company and rank *pari passu* with the US \$70.0 million senior notes and the US\$52.0 million loan facilities in International Operations. These loan facilities bear a floating interest rate based on Banker's Acceptances' rates plus stamping fees or the Canadian prime interest rate. At January 31, 2013, the Company had drawn \$52.5 million on these facilities (January 31, 2012 - \$68.9 million).

At January 31, 2013, the Canadian Operations have outstanding US\$70.0 million senior notes (January 31, 2012 - US\$70.0 million) that mature on June 15, 2014. The senior notes are secured by a floating charge on the assets of the Company and rank *pari passu* with the \$170.0 million loan facilities and the US\$52.0 million loan facilities. The US\$70.0 million senior notes have been designated as a hedge against the U.S. dollar investment in the International Operations. Of this amount, US\$42.0 million of the senior notes are at a fixed interest rate of 6.55%. Interest on US\$28.0 million has been converted by an interest rate swap from fixed to floating rates at the three-month London Interbank Offered Rate (LIBOR) plus a spread. For more information on the senior notes and financial instruments, see Note 11 and Note 14 to the consolidated financial statements.

On October 25, 2012, the Company completed the refinancing of its US\$20 million loan facility in the International Operations. The new, increased, committed, revolving loan facility provides the Company with a US\$30 million revolving loan facility for working capital requirements and general business purposes. This facility, which matures October 31, 2015, is secured by certain accounts receivable and inventories of the International Operations and bears a floating interest rate based on LIBOR plus a spread. At January 31, 2013, the Company had drawn US\$0.7 million on these facilities (January 31, 2012 - US\$ NIL).

The Company's International Operations also have available committed, revolving loan facilities of US\$52.0 million that mature on December 31, 2013. These facilities are secured by a floating charge against the assets of the Company and rank *pari passu* with the US\$70.0 million senior notes and the \$170.0 million loan facilities. These facilities bear interest at LIBOR plus a spread or the U.S. prime rate. At January 31, 2013, the Company had drawn US\$40.0 million (January 31, 2012 - US \$36.0 million) on these facilities. The Company does not anticipate any difficulty in securing financing to satisfy its maturing loan facilities however, economic conditions can change which may negatively impact the availability of credit, interest rates and the scope of financing covenants. For further information on risks related to refinancing, see liquidity risk in the risk management section on page 20.

The coverage ratio of earnings from operations ("EBIT") to interest has increased to 16.7 times compared to 14.9 times in 2011.

Interest Costs and Coverage

	2012	2011	2010
Coverage ratio	16.7	14.9	14.8
EBIT (\$ in millions)	\$ 97.1	\$ 89.3	\$ 90.3
Interest (\$ in millions)	\$ 5.8	\$ 6.0	\$ 6.1

The loan facilities and senior notes contain covenants and restrictions including the requirement to meet certain financial ratios and financial condition tests. The financial covenants include a fixed charge coverage ratio, minimum current ratio, a leverage test and a minimum net worth test. At January 31, 2013, the Company is in compliance with all covenants under these facilities. Current and forecasted debt levels are regularly monitored for compliance with debt covenants.

Contractual Obligations and Other Commitments

Contractual obligations of the Company are listed in the chart below:

(\$ in thousands)	Total	0-1 Year	2-3 Years	4-5 Years	6 Years+
Long-term debt (including capital lease obligations)	\$163,354	\$40,417	\$122,937	\$ —	\$ —
Operating leases	135,887	23,490	36,637	27,028	48,732
Other liabilities ⁽¹⁾	12,944	7,437	5,507	—	—
Total	\$312,185	\$71,344	\$165,081	\$27,028	\$48,732

(1) At year-end, the Company had additional long-term liabilities of \$34.7 million which included other liabilities, defined benefit plan obligations and deferred income tax liabilities. These have not been included as the timing and amount of the future payments are uncertain.

Director and Officer Indemnification Agreements The Company has agreements with its current and former directors, trustees, and officers to indemnify them against charges, costs, expenses, amounts paid in settlement and damages incurred from any lawsuit or any judicial, administrative or investigative proceeding in which they are sued as a result of their service. Due to the nature of these agreements, the Company cannot make a reasonable estimate of the maximum amount it could be required to pay to counterparties. The Company has also purchased directors', trustees', and officers' liability insurance. No amount has been recorded in the financial statements regarding these indemnification agreements.

Other Indemnification Agreements The Company provides indemnification agreements to counterparties for events such as intellectual property right infringement, loss or damage to property, claims that may arise while providing services, violation of laws or regulations, or as a result of litigation that might be suffered by the counterparties. The terms and nature of these agreements are based on the specific contract. The Company cannot make a reasonable estimate of the maximum amount it could be required to pay to counterparties. No amount has been recorded in the financial statements regarding these agreements.

Giant Tiger Master Franchise Agreement In 2002, the Company signed a 30-year Master Franchise Agreement with Giant Tiger Stores Limited, based in Ottawa, Ontario which granted the Company the exclusive right to open Giant Tiger stores in western Canada. Under the agreement, Giant Tiger Stores Limited provides product sourcing, merchandising, systems and administration support to the Company's Giant Tiger stores in return for a royalty based on sales. The Company is responsible for opening, owning, operating and providing food buying and distribution services to the stores. The Company's exclusivity right required that a minimum number of Giant Tiger stores be opened each year, based on an expected roll-out of 72 stores over the term of the agreement. As a result of the closure of six stores during 2012, the Company has fallen below the minimum number of stores required to maintain its exclusive right to open Giant Tiger stores in western Canada. The loss of exclusivity does not constitute an event of default under the Company's master franchise rights and will not prevent the Company from continuing to operate its existing stores or open new stores. Additional information on commitments, contingencies and guarantees is provided in Note 22 to the consolidated financial statements.

Related Parties The Company has a 50% ownership interest in a Canadian Arctic shipping company, Transport Nanuk Inc. and purchases freight handling and shipping services from Transport Nanuk Inc. and its subsidiaries. The purchases are based on market rates for these types of services in an arm's length transaction. Additional information on the Company's transactions with Transport Nanuk Inc. is included in Note 23 to the consolidated financial statements.

Letters of Credit In the normal course of business, the Company issues standby letters of credit in connection with defined benefit pension plans, purchase orders and performance guarantees. The aggregate potential liability related to letters of credit is approximately \$14 million (January 31, 2012 - \$15 million).

Capital Structure The Company's capital management objectives are to deploy capital to provide an appropriate total return to shareholders while maintaining a capital structure that provides the flexibility to take advantage of growth opportunities, maintain existing assets, meet obligations and financial covenants and enhance shareholder value. The capital structure of the Company consists of bank advances, long-term debt and shareholders' equity. The Company manages capital to optimize efficiency through an appropriate balance of debt and equity. In order to maintain or adjust its capital structure, the Company may purchase shares for cancellation pursuant to normal course issuer bids, issue additional shares, borrow additional funds, adjust the amount of dividends paid or refinance debt at different terms and conditions.

On a consolidated basis, the Company had \$163.4 million in debt and \$296.3 million in equity at the end of the year and a debt-to-equity ratio of 0.55:1 compared to 0.62:1 last year. The improvement in the debt-to-equity ratio is largely due to an increase in earnings and a reduction in the amount of debt outstanding at the end of the year as a result of positive cash flow.

Capital Structure

The capacity of the Company's capital structure is reflected in the preceding graph. Over the past five years, the Company's debt-to-equity ratio has improved from .78:1 to .55:1. Equity has increased \$21.8 million or 8.0% to \$296.3 million over the past five years and interest-bearing debt has decreased \$49.7 million or 23.3% to \$163.4 million compared to \$213.0 million in 2008. During this same time frame, the Company has made capital expenditures of \$224.1 million and has paid distributions and dividends of \$304.8 million. This reflects the Company's balanced approach of investing to sustain and grow the business while providing shareholders with an annual cash return.

Consolidated debt at the end of the year decreased \$12.5 million or 7.1% to \$163.4 million compared to \$175.9 million in 2011, and was down \$29.2 million or 15.2% from \$192.6 million in 2010. As summarized in the table below, the decrease in debt is due to lower amounts drawn on the Canadian Operations and International Operations loan facilities and the repayment of a US\$3.9 million note payable in 2011. The Company has US\$111.3 million in debt at January 31, 2013 (January 31, 2012 - US\$107.2 million) that is exposed to changes in foreign exchange rates when translated into Canadian dollars. The exchange rate used to translate U.S. denominated debt into Canadian dollars at January 31, 2013 was 0.9992 compared to 1.0052 at January 31, 2012 and 1.0022 at January 31, 2011. The difference in exchange rate did not have a significant impact on the translation of U.S. denominated debt between 2010 and 2012. Average debt outstanding during the year excluding the foreign exchange impact decreased \$13.6 million or 7.0% from 2011 and was down \$34.1 million or 15.9% compared to 2010. The debt outstanding at the end of the fiscal year is summarized as follows:

(\$ in thousands at the end of the fiscal year)	2012	2011	2010
Senior notes	\$ 69,461	\$ 69,626	\$ 69,199
Canadian revolving loan facilities	52,499	68,850	67,445
U.S. revolving loan facilities	39,968	36,187	50,110
Notes payable	388	659	4,850
Finance lease liabilities	320	570	992
Bank advances	718	—	—
Total	\$ 163,354	\$ 175,892	\$ 192,596

Shareholder Equity The Company has an unlimited number of authorized shares and had issued and outstanding shares at January 31, 2013 of 48,388,721 (48,378,000 as at January 31, 2012). Further information on the Company's share capital is provided in Note 15 to the consolidated financial statements.

Book value per share, on a diluted basis, at the end of the year increased to \$6.10 compared to \$5.85 per share in 2011. Shareholders' equity increased \$12.5 million or 4.4% compared to 2011 due to higher net earnings, partially offset by a \$2.6 million charge to retained

earnings for net actuarial losses on the Company's defined benefit pension plan and an increase in dividends to shareholders. Further information is provided in the statements of changes in shareholders' equity in the consolidated financial statements.

QUARTERLY FINANCIAL INFORMATION

Historically, the Company's first quarter sales are the lowest and fourth quarter sales are the highest, reflecting consumer buying patterns. Weather conditions are often more extreme compared to other retailers and can affect sales in any quarter. Net earnings generally follow higher sales, but can be dependent on markdown activity in key sales periods to reduce excess inventories. Net earnings are historically lower in the first quarter due to lower sales and fixed costs such as rent and overhead that apply uniformly throughout the year.

The following is a summary of selected quarterly financial information:

(\$ thousands)	Q1	Q2	Q3	Q4	Total
Sales					
2012	\$365,517	\$383,843	\$377,664	\$386,622	\$1,513,646
2011	\$346,262	\$372,945	\$378,359	\$397,570	\$1,495,136
Trading profit (EBITDA)					
2012	\$ 29,884	\$ 36,572	\$ 35,748	\$ 32,063	\$ 134,267
2011	\$ 28,387	\$ 32,408	\$ 34,476	\$ 30,610	\$ 125,881
Earnings from operations (EBIT)					
2012	\$ 20,571	\$ 27,361	\$ 26,365	\$ 22,821	\$ 97,118
2011	\$ 19,385	\$ 23,408	\$ 25,448	\$ 21,068	\$ 89,309
Net earnings					
2012	\$ 13,553	\$ 18,277	\$ 17,487	\$ 15,831	\$ 65,148
2011	\$ 12,425	\$ 15,035	\$ 17,000	\$ 13,501	\$ 57,961
Earnings per share-basic					
2012	\$ 0.28	\$ 0.38	\$ 0.36	\$ 0.33	\$ 1.35
2011	\$ 0.26	\$ 0.31	\$ 0.35	\$ 0.28	\$ 1.20
Earnings per share-diluted					
2012	\$ 0.28	\$ 0.38	\$ 0.36	\$ 0.32	\$ 1.34
2011	\$ 0.26	\$ 0.31	\$ 0.35	\$ 0.27	\$ 1.19

Fourth Quarter Highlights Fourth quarter consolidated sales decreased 2.8% to \$386.6 million compared to \$397.6 million in 2011 primarily due to weaker performance from general merchandise categories and the impact of previously announced store closures. Excluding the foreign exchange impact, sales decreased 1.9% and were down 1.2%⁽¹⁾ on a same store basis. Food sales⁽¹⁾ decreased 0.3% but were up 0.6% on a same store basis. General merchandise sales⁽¹⁾ decreased 7.3% and were down 6.8% on a same store basis.

Earnings from Operations increased 8.3% to \$22.8 million compared to \$21.1 million in the fourth quarter last year due to gross profit rate improvements and lower selling, operating and administrative expenses. The gross profit rate improvement is primarily due to the availability of special item buys, favourable product mix changes, and reduction in product waste within perishable food categories. Selling, operating and administrative expenses decreased 2.4% compared to last year due in part to lower incentive plan expenses in the International Operations and were up 8 basis points as a percentage to sales. Excluding the foreign exchange impact, earnings from operations increased 9.2% compared to last year.

Trading profit or earnings before interest, income taxes, depreciation and amortization (EBITDA) increased 4.7% to \$32.1 million compared to \$30.6 million last year as gains within Canadian Operations more than offset a decrease in the International Operations.

(1) Excluding the foreign exchange impact.

Excluding the foreign exchange impact, trading profit increased \$1.7 million or 5.5% and was 8.3% as a percentage to sales compared to 7.7% last year.

Interest expense decreased \$0.5 million to \$1.1 million due in part to the impact of lower average debt in the quarter and an increase in the capitalization of interest on construction projects.

Income tax expense was flat to last year as higher earnings in the Canadian Operations were partially offset by lower income tax rates and the impact of income earned across the various tax jurisdictions in the International Operations. The consolidated effective tax rate in the quarter was 27.2% compared to 30.6% last year.

Net earnings increased 17.3% to \$15.8 million and diluted earnings per share increased to \$0.32 compared to \$0.27 per share last year largely due to earnings growth in the Canadian Operations and lower income tax rates.

The Company recorded an actuarial gain of \$2.5 million, net of deferred income tax, in other comprehensive income resulting from an increase in the discount rate and a higher than expected return on pension plan assets in the quarter.

Working capital decreased \$54.1 million or 32.2% compared to the fourth quarter last year largely due to the increase in the current portion of long-term debt. The increase in the current portion of long-term debt is due to the International Operations loan facilities that mature December 31, 2013. Excluding the impact of the maturing loan facilities, working capital decreased \$14.1 million or 8.4% compared to last year largely due to an increase in accounts payable and income tax payable related to the timing of payments.

Cash flow from operating activities in the quarter decreased \$1.5 million or 2.9% to \$51.4 million from \$52.9 million last year. The decrease is largely due to the change in non-cash working capital related to the change in accounts receivable and accounts payable in the quarter compared to the prior year.

Cash used for investing activities in the quarter decreased to \$14.4 million compared to \$17.1 million last year due to a difference in the timing of capital investments.

Cash used in financing activities in the quarter was \$39.3 million compared to \$42.8 million last year. The change in long-term debt in the quarter is largely due to the change in the amounts drawn on the Company's Canadian revolving loan facilities compared to last year. The Company paid dividends of \$12.6 million, an increase of 8.4% compared to the fourth quarter last year.

Further information on the quarterly financial performance of the Company is provided in the interim MD&A available on the Company's website at www.northwest.ca or on SEDAR at www.sedar.com.

DISCLOSURE CONTROLS

Management is responsible for establishing and maintaining a system of disclosure controls and procedures to provide reasonable assurance that material information relating to the Company is reported to senior management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") on a timely basis so that decisions can be made regarding public disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based on an evaluation of the Company's disclosure controls and procedures, as required by National Instrument 52-109 (Certification of Disclosure in Issuers' Annual and Interim Filings), the Company's CEO and CFO have concluded that these controls and procedures were designed and operated effectively as of January 31, 2013.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining internal controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can only provide reasonable assurance with respect to financial reporting. Based on an evaluation of the Company's internal controls over financial reporting using the framework published by The Committee of Sponsoring Organizations of the Treadway Commission ("COSO Framework") as required by National Instrument 52-109, the Company's CEO and CFO have concluded that the internal controls over financial reporting were designed and operated effectively as of January 31, 2013. There have been no changes in the internal controls over financial reporting during the quarter and for the year ended January 31, 2013 that have materially affected or are reasonably likely to materially affect the internal controls over financial reporting.

OUTLOOK

The Company's continued focus on merchandise productivity and operational excellence, driven by the *More Growth in Store* initiatives described in the strategy section, are expected to provide operating margin upside within remote store markets. Overall, consumer incomes and spending momentum is expected to be flat to 2012, depending on the degree of improvement within the natural resource and tourism sectors. The Company's Giant Tiger stores are expected to come under sales and gross margin pressure due to anticipated changes in the competitive environment from existing retailers and new entrants forecasted in 2013. Offsetting gains are expected from lower perishable product waste, improved general merchandise inventory productivity and the closure of under-performing stores in fiscal 2012.

Net capital expenditures for 2013 are expected to be approximately \$50 million (2012 - \$48.8 million) reflecting the opening and acquisition of new stores, store replacement projects, energy efficiency projects, and the final phase of a transportation management system. Actual expenditures depend upon the completion of negotiations and shipment of construction materials to remote locations and therefore, the actual amount and timing of expenditures can fluctuate as it has over the past few years.

Following the conversion to a share corporation on January 1, 2011 and the deferral of the payment of Canadian income taxes in the 2011 transition year in accordance with income tax legislation enacted November 21, 2011, the Company began paying Canadian income tax installments in 2012 which has reduced cash flow from operating activities. The Company will pay the remaining balance of the accrued income taxes for 2012 of approximately \$19 million in the first quarter of 2013. The Company expects its Canadian monthly income tax installments to increase in 2013 based on a normalized level of taxable income in 2012 and the recognition of a portion of the deferred taxable income from the transition year. These income tax payments will reduce cash flow from operating activities in 2013.

The adoption of new accounting standards for defined benefit pension plans will result in the restatement of the 2012 comparative numbers in the 2013 consolidated financial statements. The Company expects these new standards will result in a decrease in 2012 restated net earnings of approximately \$1.260 million. Further information on future accounting standards is provided on page 23.

RISK MANAGEMENT

The North West Company maintains an Enterprise Risk Management ("ERM") program which assists in identifying, evaluating and managing risks that may reasonably have an impact on the Company. An annual ERM assessment is completed to evaluate risks and the potential impact that the risks may have on the Company's ability to execute its strategies and achieve its objectives. The results of this assessment are presented to the Board of Directors who are accountable for providing oversight of the ERM program.

The North West Company is exposed to a number of risks in its business. The descriptions of the risks below are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company, or that the Company deems immaterial, may also impair the operations of the Company. If any of such risks actually occur, the business, financial condition, liquidity, and results of operations of the Company could be materially adversely affected. Readers of this MD&A are also encouraged to refer to the Key Performance Drivers and Capabilities and Outlook sections of this MD&A, as well as North West's Annual Information Form, which provides further information on the risk factors facing the Company. While the Company employs strategies to minimize these risks, these strategies do not guarantee that events or circumstances will not occur that could negatively impact the Company's financial condition and performance. Careful consideration should be given to the risk factors which include, but are not limited to, the following:

Business Model The Company serves geographically diverse markets and sells a very wide range of products and services. Operational scale can be difficult to achieve and the complexity of the Company's business model is higher compared to more narrowly-focused or larger retailers. Management continuously assesses the strength of its customer value offer to ensure that specific market, product and service activities are attractive. Considerable attention is also given to streamlining processes to simplify work across the Company. To the extent the Company is not successful in developing and executing its strategies, it could have an adverse effect on the financial condition and performance of the Company.

Employee Development and Retention Attracting, retaining and developing high calibre employees is essential to effectively managing our business, executing our strategies and meeting our objectives. Due to the vast geography and remoteness of the Company's markets, there is significant competition for talent and a limited number of qualified personnel, particularly at the store management level. The degree to which the Company is not successful in retaining and developing employees and establishing appropriate succession plans could lead to a lack of knowledge, skills and experience required to effectively run our operations and execute our strategies. The Company's store stability initiative described on page 5 is focused on having all stores reach a targeted level of capability and stability. In addition to compensation programs and investments in staff housing that are designed to attract and retain qualified personnel, the Company also continues to implement and refine initiatives such as comprehensive store-based manager-in-training programs and the Company's in-depth leadership development program.

Community Relations A portion of the Company's sales are derived from communities and regions that restrict commercial land ownership and usage by non-indigenous or non-local owned businesses or which have enacted policies and regulations to support locally-owned businesses. We successfully operate within these environments through initiatives that promote positive community and customer relations. These include store lease arrangements with community-based development organizations and initiatives to

recruit local residents into management positions and to incorporate community stakeholder advice into our business at all levels. To the extent the Company is not successful in maintaining positive community and customer relations in these locations, or is unable to renew lease agreements with community-based organizations, or is subject to punitive fees or operating restrictions, it could have an adverse effect on sales and financial performance.

Economic Environment External factors which affect customer demand and personal disposable income, and over which the Company exercises no influence, include government fiscal health, general economic growth, changes in commodity prices, inflation, unemployment rates, personal debt levels and levels of personal disposable income, interest rates and foreign exchange rates. Changes in the inflation rate are unpredictable and may impact the cost of merchandise and the prices charged to consumers which in turn could negatively impact sales and net earnings. Although our core customer is a lower income shopper with relatively stable income sources, a decrease in government income transfer payments to individuals, a recession, or a significant and prolonged decline in consumer spending could have an adverse effect on the financial condition and results of operations. Furthermore, customers in many of the Company's markets benefit from product cost subsidies through programs such as Nutrition North Canada ("NNC"), the U.S. Supplemental Nutrition Assistance Program ("SNAP") and the by-pass mail system in Alaska. A deterioration in government fiscal health could result in a reduction in financial support for these programs which would have a significant impact on the price of merchandise and consumer demand. Management regularly monitors economic conditions and considers factors which can affect customer demand in making operating decisions and the development of strategic initiatives and long-range plans.

Consumer Income Our largest customer segments derive most of their income directly or indirectly from government infrastructure spending or direct payment to individuals in the form of social assistance, child tax benefits and old age security. These tend to be stable sources of income, independent of economic cycles. Other forms of government spending such as NNC and SNAP also contribute to lower living costs for eligible customers. A major source of employment income is generated from local government and spending on public infrastructure. This includes housing, schools, health care facilities, military facilities, roads and sewers. Local employment levels will fluctuate from year-to-year depending on the degree of infrastructure activity and a community's overall fiscal health, especially near the end of the government budget year. A similar fluctuating source of income is employment related to tourism and natural resource development. A significant or prolonged reduction in government transfers, subsidy programs, spending on infrastructure projects, natural resource development and tourism spending would have a negative impact on consumer income which in turn could result in a decrease in sales and gross profit, particularly for more discretionary general merchandise items.

Competition We have a leading market position in a large percentage of the markets we serve. Sustaining and growing this position depends on our ability to continually improve customer satisfaction while identifying and pursuing new sales opportunities. We actively monitor competitive activity and we are proactive in enhancing our value offer elements, ranging from in-stock position to service and pricing. The entrance of new competitors, an increase in competition, both local and outside the community, or the introduction of new products and services in the Company's markets could negatively impact sales and financial performance.

Fuel and Utility Costs Compared to other retailers, the Company is more exposed to fluctuations in the price of energy, particularly oil. Due to the vast geography and remoteness of the store network, expenses related to aviation fuel, diesel-generated electricity, and heating fuel costs are a more significant component of the Company's and its customers' expenses. To the extent that escalating fuel and utility costs cannot be offset by alternative energy sources, energy conservation practices or offsetting productivity gains, they may result in higher retail prices or lower operating margins which may affect the Company's financial performance. In this scenario, consumer retail spending will also be affected by higher household energy-related expenses.

Information Technology The Company relies on information technology ("IT") to support the current and future requirements of the business. Any significant failure or disruption in IT systems, or the failure to successfully upgrade legacy systems or implement new systems could have an adverse effect on the financial condition and results of operations. In 2013, the Company will implement a transportation management system ("TMS"). Failure by the Company to successfully implement this system could cause disruption in the flow of merchandise to the stores, which could negatively affect the reputation and financial performance of the Company. Furthermore, the failure to integrate the TMS with other IT systems and implement appropriate processes to support the TMS may result in failing to capture planned efficiency and effectiveness gains. To mitigate these risks, the Company has engaged an implementation partner and instilled a strong governance structure and disciplined project management.

Food Safety The Company is exposed to risks associated with food safety and product handling. Food sales represent approximately 77% of total Company sales. A significant outbreak of a food-borne illness or increased public concerns with certain food products could have an adverse effect on the financial performance and reputation of the Company. The Company has food preparation, handling and storage procedures which help mitigate these risks. The Company also has product recall procedures in place in the event of a food-borne illness outbreak. The existence of these procedures does not eliminate the underlying risks and the ability of these procedures to mitigate risk in the event of a food-borne illness is dependent on their successful execution.

Income Taxes The Company accounts for income taxes using the liability method of tax allocation. Under the liability method, deferred income tax assets and liabilities are determined based on the differences between the financial statement carrying values and tax bases of assets and liabilities, and are measured using substantively enacted tax rates and laws that are expected to be in effect in the periods in which the deferred income tax assets or liabilities are expected to be realized or settled. The provision for income taxes is recorded in the Company at applicable statutory rates.

In the ordinary course of business, the Company is subject to ongoing audits by tax authorities. While the Company believes that its tax filing positions are appropriate and supportable, the possibility exists that certain matters may be reviewed and challenged by the tax authorities. The Company regularly reviews the potential for adverse outcomes and the adequacy of its tax provisions. The Company believes that it has adequately provided for these matters. If the final outcome differs materially from the tax provisions, the Company's income tax expense and its earnings could be affected positively or negatively in the period in which the matters are resolved.

Laws, Regulations and Standards The Company is subject to various laws and regulations administered by federal, provincial and foreign regulatory authorities, including but not limited to income, commodity

and other taxes, duties, currency repatriation, zoning, health and safety, employment standards, privacy laws and licensing requirements. New accounting standards and pronouncements or changes in accounting standards, may also impact the Company's financial results. These laws, regulations and standards and their interpretation by various courts and agencies are subject to change. In the course of complying with such changes, the Company may incur significant costs. Failure by the Company to fully comply with applicable laws, regulations and standards could result in financial penalties, assessments, sanctions, or legal action that could have an adverse effect on the reputation and the financial performance of the Company.

Vendor and Third Party Service Partner Management The Company relies on a broad base of manufacturers, suppliers, logistics service providers and operators of distribution facilities to provide goods and services. Events or disruptions affecting these suppliers outside of the Company's control could in turn result in delays in the delivery of merchandise to the stores and therefore negatively impact financial performance. A portion of the merchandise the Company sells is purchased offshore. Offshore sourcing could provide products that contain harmful or banned substances or do not meet the required standards. The Company uses offshore consolidators and sourcing agents to monitor product quality and reduce the risk of sub-standard products however, there is no certainty that these risks can be completely mitigated in all circumstances.

Environmental The Company owns a large number of facilities and real estate, particularly in remote locations, and is subject to environmental risks associated with the contamination of such facilities and properties. The Company operates gasoline dispensing units in a number of locations and also uses fuel to heat stores and housing. Contamination resulting from gasoline and heating fuel is possible. The Company employs operating, training, monitoring and testing procedures to minimize the risk of contamination. The Company also operates refrigeration equipment in its stores and distribution centers which, if the equipment fails, could release gases that may be harmful to the environment. The Company has monitoring and preventative maintenance procedures to reduce the risk of this contamination occurring. Even with these risk mitigation policies and procedures, the Company could incur increased or unexpected costs related to environmental incidents and remediation activities, including litigation and regulatory compliance costs, all of which could have an adverse effect on the reputation and financial condition and financial performance of the Company.

Management of Inventory Success in the retail industry depends on being able to select the right merchandise, in the correct quantities in proportion to the demand for such merchandise. A miscalculation of consumer demand for merchandise could result in having excess inventory for some products and missed sales opportunities for others. Excess inventory may result in higher markdowns or inventory shrinkage all of which could have an adverse effect on the financial performance of the Company.

Insurance The Company manages its exposure to certain risks through an integrated insurance program which combines an appropriate level of self-insurance and the purchase of various insurance policies. The Company's insurance program is based on various lines and limits of coverage. Insurance is arranged with financially stable insurance companies as rated by the professional rating agencies. There is no guarantee that any given risk will be mitigated in all circumstances or that the Company will be able to continue to purchase this insurance coverage at reasonable rates.

Climate The Company's operations are exposed to extreme weather conditions ranging from blizzards to hurricanes, typhoons, cyclones, and tsunamis which can cause loss of life, damage to or destruction of key stores and facilities, or temporary business disruptions. The stores located in the South Pacific, Caribbean and coastal areas of Alaska are also at risk of earthquakes which can result in loss of life and destruction of assets. Such losses could have an adverse effect on the financial condition and performance of the Company. Global warming conditions would also have a more pronounced effect, both positive and negative, on the Company's most northern latitude stores.

Post-Employment Benefits The Company engages professional investment advisors to manage the assets in the defined benefit pension plans. The performance of the Company's pension plans and the plan funding requirements are impacted by the returns on plan assets, changes in the discount rate and regulatory funding requirements. If capital market returns are below the level estimated by management, or if the discount rate used to value the liabilities of the plans decreases, the Company may be required to make contributions to its defined benefit pension plans in excess of those currently contemplated, which may have an adverse effect on the Company's financial condition and performance.

The Company regularly monitors and assesses the performance of the pension plan assets and the impact of changes in capital markets, changes in plan member demographics, and other economic factors that may impact funding requirements, benefit plan expenses and actuarial assumptions. The Company makes cash contributions to the pension plan as required and also uses letters of credit to satisfy a portion of its funding obligations. Effective January 1, 2011, the Company entered into an amended and restated staff pension plan and added a defined contribution plan. Under the amended pension plan, all members who did not meet a qualifying threshold based on number of years in the pension plan and age were transitioned to the defined contribution pension plan effective January 1, 2011 and no longer accumulate years of service under the defined benefit pension plan. Further information on post-employment benefits is provided on page 14 and in Note 12 to the consolidated financial statements.

Ethical Business Conduct The Company has a Code of Business Conduct and Ethics policy which governs both employees and Directors. The Business Ethics Committee monitors compliance with the Code of Business Conduct and Ethics. The Company also has a Whistleblower policy that provides direct access to members of the Board of Directors. Unethical business conduct could negatively impact the Company's reputation and relationship with its customers, investors, and employees, which in turn could have an adverse effect on the financial performance of the Company.

Geopolitical Changes in the domestic or international political environment may impact the Company's ability to source and provide products and services. Acts of terrorism, riots, and political instability, especially in less developed markets, could have an adverse effect on the financial condition and results of operations of the Company.

Litigation In the normal course of business, the Company is subject to a number of claims and legal actions that may be made by its customers, suppliers and others. If management believes the Company has liability for such claim or legal action, provisions are made in the Company's financial statements. If management's assessment of liability or the amount of any such claim is incorrect, or the Company is unsuccessful in defending its position, any difference between the judgment or penalty amount and the provision would become an expense or a recovery in the period such claim was resolved.

Financial Services Business The financial services operations are a part of the business of the Company. There is a risk of customer defaults on credit accounts, particularly following deterioration in the economy. The credit card industry is highly competitive and other credit card issuers may seek to expand or to enter the Company's markets. New federal, provincial and state laws, and amendments to existing laws, may be enacted to further regulate the credit card industry or to reduce finance charges or other fees or charges applicable to credit card accounts. Deterioration in the financial services business could have an adverse effect on the financial condition or performance of the Company.

Dependence on Key Facilities There are six major distribution centres which are located in Winnipeg, Manitoba; Anchorage, Alaska; San Leandro, California; Port of Tacoma, Washington; and third party managed facilities in Edmonton, Alberta and Miami, Florida. In addition, the Company's Canadian Operations support office is located in Winnipeg, Manitoba and the International Operations has support offices in Anchorage, Alaska and Bellevue, Washington. A serious disruption at any of these facilities or those of any of the corporate alliance partners due to fire, inclement weather or otherwise could have a material adverse effect on the financial condition or performance of the Company.

Financial Risks In the normal course of business, the Company is exposed to financial risks that have the potential to negatively impact its financial performance. The Company manages financial risk with oversight provided by the Board of Directors, who also approve specific financial transactions. The Company uses derivative financial instruments only to hedge exposures arising in respect of underlying business requirements and not for speculative purposes. These risks and the actions taken to minimize the risks are described below. Further information on the Company's financial instruments and associated risks are provided in Note 14 to the consolidated financial statements.

Credit Risk Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk primarily in relation to individual and commercial accounts receivable. The Company manages credit risk by performing regular credit assessments of its customers and provides allowances for potentially uncollectible accounts receivable. The Company does not have any individual customer accounts greater than 10% of total accounts receivable.

Liquidity Risk Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due or can do so only at excessive cost. The Company manages liquidity risk by maintaining adequate credit facilities to fund operating requirements and sustaining and planned growth-related capital expenditures and regularly monitoring actual and forecasted cash flow and debt levels. At January 31, 2013, the Company had undrawn committed revolving loan facilities available of \$144.1 million (January 31, 2012 - \$126.4 million).

The Company's International Operations has a US\$52 million loan facility that matures December 31, 2013. The Company does not anticipate any difficulty in refinancing this loan facility however, global economic conditions can change which may negatively impact the availability of credit, interest rates and covenants for companies seeking to refinance debt. To the extent that the Company cannot meet its obligations or refinance its debt when it comes due, or can only do so at an excessive cost, this may have an adverse effect on the financial condition and financial performance of the Company. For further information on loan facilities, see Note 11 to the consolidated financial statements.

Currency Risk Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to currency risk, primarily the U.S. dollar, through its net investment in International Operations and its U.S. dollar denominated borrowings. The Company manages its exposure to currency risk by hedging the net investment in foreign operations with a portion of U.S. dollar denominated borrowings as described in the Sources of Liquidity section on page 14. At January 31, 2013, the Company had US\$111.3 million in U.S. denominated debt compared to US\$107.2 million at January 31, 2012. Further information on the impact of foreign exchange rates on the translation of U.S. denominated debt is provided in the Capital Structure section on page 16.

The Company is also exposed to currency risk relating to the translation of International Operations earnings from U.S. dollars to Canadian dollars. In 2012, the average exchange rate used to translate U.S. denominated earnings from the International Operations was relatively flat at 0.998 compared to 0.991 last year. The Canadian dollar's depreciation versus the U.S. dollar in 2011 positively impacted consolidated net earnings by \$0.1 million. In 2011, the average exchange rate of 0.991 was 3.4% lower than the 1.026 average exchange rate in 2010 which decreased 2011 consolidated net earnings by \$0.4 million compared to 2010.

Interest Rate Risk Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk primarily through its long-term borrowings. The Company manages exposure to interest rate risk by using a combination of interest rate swaps and a mixture of fixed and floating interest rate debt. Additional information regarding interest rate swaps is provided in Note 11 and Note 14 to the consolidated financial statements.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts and disclosures made in the consolidated financial statements and accompanying notes. Management continually evaluates the estimates and assumptions it uses. These estimates and assumptions are based on management's historical experience, knowledge of current events, expectations of future outcomes and other factors that management considers reasonable under the circumstances. Actual results could differ from these estimates as confirming events occur. The estimates and assumptions described in this section depend upon subjective or complex judgments about matters that may be uncertain and changes in these estimates and assumptions could materially impact the consolidated financial statements.

Valuation of Accounts Receivable The Company records an allowance for doubtful accounts related to accounts receivable that may potentially be impaired. The allowance is based on the aging of the accounts receivable, our knowledge of our customers' financial condition, the current business environment and historical experience. A significant change in one or more of these factors could impact the estimated allowances for doubtful accounts recorded in the consolidated balance sheet and the provisions for debt loss recorded in the consolidated statement of earnings. Additional information on the valuation of accounts receivable is provided in Note 5 and the credit risk section in Note 14 to the consolidated financial statements.

Valuation of Inventories Retail inventories are stated at the lower of cost and net realizable value. Significant estimation or judgment is

required in the determination of: (1) discount factors used to convert inventory to cost after a physical count at retail has been completed; (2) recognizing merchandise for which the customer's perception of value has declined and appropriately marking the retail value of the merchandise down to the perceived value; and (3) estimating inventory losses, or shrinkage, occurring between the last physical count and the balance sheet date.

Food inventories counted at retail are converted to cost by applying a discount factor to retail selling prices. This discount factor is calculated in relation to historical gross margins and is reviewed on a regular basis for reasonableness. General merchandise inventories counted at retail are converted to cost by applying average cost factors by merchandise category. These cost factors represent the average cost-to-retail ratio for each merchandise category based on beginning inventory and purchases made throughout the year.

Inventory shrinkage is estimated as a percentage of sales for the period from the date of the last physical inventory count to the balance sheet date. The estimate is based on experience and the most recent physical inventory results. To the extent that actual losses experienced vary from those estimated, both inventories and cost of sales may be impacted.

Changes or differences in these estimates may result in changes to inventories on the consolidated balance sheet and a charge or credit to cost of sales in the consolidated statement of earnings. Additional information regarding inventories is provided in Note 6 to the consolidated financial statements.

Post-Employment Benefits The cost and defined benefit plan obligations of the Company's defined benefit pension plans are accrued based on actuarial valuations which are dependent on assumptions determined by management. These assumptions include the discount rate used to calculate benefit plan obligations, expected long-term rate of return on plan assets, rate of compensation increase, retirement ages, and mortality rates. These assumptions are reviewed by management and the Company's actuaries.

The discount rate used to calculate benefit plan obligations, expected long-term rate of return on plan assets and the rate of compensation increase are the three most significant assumptions. The discount rate used to calculate benefit plan obligations is based on market interest rates, as at the Company's measurement date of January 31, 2013 on a portfolio of Corporate AA bonds with terms to maturity that, on average, matches the terms of the defined benefit plan obligations. The discount rates used to measure the benefit plan obligations for fiscal 2012 and 2011 were 4.3% and 4.5% respectively. The expected long-term rate of return on plan assets is based on historical returns, the asset mix and current investment yields. The expected long-term rate of return on plan assets for fiscal 2012 and 2011 was 6.5%. Management assumed the rate of compensation increase for fiscal 2012 and 2011 at 4%.

These assumptions may change in the future and may result in material changes in the defined benefit plan obligation on the Company's consolidated balance sheet, the defined benefit plan expense on the consolidated statement of earnings and the net actuarial gains or losses recognized in comprehensive income and retained earnings. Changes in financial market returns and interest rates could also result in changes to the funding requirements of the Company's defined benefit pension plans. Additional information regarding the Company's post-employment benefits is provided in Note 12 to the consolidated financial statements.

Impairment of Long-lived Assets The Company assesses the recoverability of values assigned to long-lived assets quarterly after considering potential impairment indicated by such factors as business and market trends, future prospects, current market value and other economic factors. If there is an indication of impairment, the

recoverable amount of the asset, which is the higher of its fair value less costs to sell and its value in use, is estimated in order to determine the extent of the impairment loss. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit (CGU) to which the asset belongs. For tangible and intangible assets excluding goodwill, the CGU is the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets. Any impairment charge is recognized in the consolidated statement of earnings in the period in which it occurs, to the extent that the carrying value exceeds its recoverable amount.

The underlying estimates for cash flows include estimates for future sales, gross margin rates and store expenses, and are based upon the stores' past and expected future performance. Changes which may impact future cash flows include, but are not limited to, competition, general economic conditions and unrecoverable increases in operating costs. To the extent that management's estimates are not realized, future assessments could result in impairment charges that may have a significant impact on the Company's consolidated balance sheet and consolidated statement of earnings.

Goodwill Goodwill is not amortized but is subject to an impairment test annually and whenever indicators of impairment are detected. Goodwill is allocated to CGU's that are expected to benefit from the synergies of the related business combination and represents the lowest level within the Company at which goodwill is monitored for internal management purposes, which is the Company's International Operating segment before aggregation.

The value of the goodwill was tested by means of comparing the recoverable amount of the operating segment to its carrying value. To calculate the operating segment's recoverable amount, the Company uses the capitalized earnings method. The product of maintainable earnings and a capitalization rate are used to determine the recoverable amount. The capitalization rate is based on the International Operations weighted-average cost of capital. Key assumptions in the capitalization rate include: equity risk premium, debt-to-equity ratio, pre-tax cost of debt capital and company specific risk premium. To the extent that management's estimates are not realized, future assessments could result in impairment charges that may have a significant impact on the Company's consolidated balance sheet and consolidated statement of earnings.

The Company performed the annual goodwill impairment test in 2012 and determined that the recoverable amount of the International Operations operating segment exceeded its carrying value. No goodwill impairment was identified and management considers any reasonably foreseeable changes in key assumptions unlikely to produce a goodwill impairment.

Income Taxes Deferred tax assets and liabilities are recognized for the future income tax consequences attributable to temporary differences between the financial statement carrying values of assets and liabilities and their respective income tax bases. Deferred income tax assets or liabilities are measured using enacted or substantively enacted income tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The calculation of current and deferred income taxes requires management to make estimates and assumptions and to exercise a certain amount of judgment regarding the financial statement carrying values of assets and liabilities which are subject to accounting estimates inherent in those balances. The deferred income tax assets and liabilities are also impacted by the interpretation of income tax legislation across various jurisdictions, expectations about future financial results and the timing of reversal of temporary differences, and possible audits of tax filings by the regulatory agencies.

Changes or differences in these estimates or assumptions may result in changes to the current or deferred income tax balances on the consolidated balance sheet, a charge or credit to income tax expense in the consolidated statement of earnings and may result in cash payments or receipts. Additional information on income taxes is provided in Note 9 to the consolidated financial statements.

FUTURE ACCOUNTING STANDARDS

The Company is currently assessing the impact of the following standards that may apply in future periods. Unless otherwise noted, the following revised standards and amendments are effective for the Company's annual periods beginning February 1, 2013.

Consolidated Financial Statements The International Accounting Standards Board ("IASB") issued IFRS 10, *Consolidated Financial Statements* replacing portions of IAS 27, *Consolidated and Separate Financial Statements* addressing consolidation and superseding Standing Interpretations Committee (SIC) Interpretation 12 in its entirety. IFRS 10 establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This standard is not expected to have a significant impact on the consolidated financial statements.

Joint Arrangements The IASB issued IFRS 11, *Joint Arrangements* superseding IAS 31, *Interest in Joint Ventures* and SIC-13, *Jointly Controlled Entities – Non Monetary Contributions by Venturers*. IFRS 11 establishes principles for determining the type of joint arrangement by assessing the venturers' rights and obligations. This standard provides guidance for financial reporting activities required by entities that have an interest in a jointly controlled arrangement. Joint ventures will be accounted for using the equity method of accounting, whereas for a joint operation the venturer will recognize its share of the ventures' assets, liabilities, revenues and expenses. The adoption of IFRS 11 is not expected to have a significant impact on the consolidated financial statements.

Disclosure of Interests in Other Entities The IASB issued IFRS 12, *Disclosure of Interests in Other Entities* requiring extensive disclosures relating to a company's interest in subsidiaries, associates and certain other arrangements. IFRS 12 enables financial statement users to evaluate the nature and risks associated with these interests, and evaluate their effect on the Company's financial performance. This standard is not expected to have a significant impact on the consolidated financial statements.

Employee benefits The revised IAS 19, *Employee Benefits* issued by the IASB eliminates the option to defer the recognition of actuarial gains and losses on defined benefit plans. It amends the calculation of plan assets and benefit obligations, streamlines the presentation of changes in defined benefit plans and requires enhanced disclosure. The requirement to calculate the expected return on plan assets with the interest rate used to calculate the defined benefit plan obligation is the most significant for the Company. The Company will adopt this standard for its fiscal year beginning February 1, 2013. The implementation of this standard in the Company's 2013 financial statements will require the restatement of the 2012 comparative numbers with an estimated decrease in net earnings of \$1.260 million comprised of an increase to interest expense of \$1.170 million, an increase to selling, operating and administrative expenses of \$0.550 million and a deferred tax recovery of \$0.460 million.

Financial Instruments The IASB has issued a new standard which will eventually replace IAS 39, *Financial Instruments: Recognition and Measurement*. The development of IFRS 9, *Financial Instruments* is a multi-phase project with a goal of improving and simplifying financial instrument reporting. IFRS 9 uses a single approach to determine measurement of a financial asset based on how an entity manages financial impairment, replacing the multiple classification options in IAS 39 with only two categories: amortized cost and fair value through profit or loss. This standard is effective for the Company's financial year beginning February 1, 2015. The Company is currently assessing the impact of changes to this standard.

Presentation of Financial Statements The IASB has amended IAS 1, *Presentation of Financial Statements* to enhance the presentation of Other Comprehensive Income (OCI). These amendments require the components of OCI to be presented separately for items that may be reclassified to the statement of earnings from those that remain in equity. This standard is not expected to have a significant impact on the consolidated financial statements.

Fair Value Measurement IFRS 13, *Fair Value Measurement* is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. This standard is not expected to have a significant impact on the consolidated financial statements.

Financial Instruments The IASB has issued amendments to IFRS 7, *Financial Instruments: Disclosures* and IAS 32, *Financial Instruments: Presentation* which clarify the requirements for offsetting financial assets and financial liabilities along with new disclosure requirements. These amendments are effective for the Company's financial years beginning February 1, 2014 and February 1, 2013 respectively. These standards are not expected to have a significant impact on the consolidated financial statements.

NON-GAAP FINANCIAL MEASURES

(1) Trading Profit (EBITDA) is not a recognized measure under IFRS. Management believes that in addition to net earnings, trading profit is a useful supplemental measure as it provides investors with an indication of the Company's operational performance before allocating the cost of interest, income taxes and capital investments. Investors should be cautioned however, that trading profit should not be construed as an alternative to net earnings determined in accordance with IFRS as an indicator of the Company's performance. The Company's method of calculating trading profit may differ from other companies and may not be comparable to measures used by other companies. A reconciliation of consolidated net earnings to trading profit or EBITDA is provided below:

Reconciliation of Net Earnings to Trading Profit (EBITDA)

(\$ in thousands)	2012	2011	2010
Net earnings	\$ 65,148	\$ 57,961	\$ 69,656
Add:			
Amortization	37,149	36,572	35,492
Interest expense	5,809	6,026	6,077
Income taxes	26,161	25,322	14,539
Trading profit (EBITDA)	\$ 134,267	\$ 125,881	\$ 125,764

For trading profit information by business segment, see Note 4 "Segmented Information" in the notes to the consolidated financial statements.

(2) Earnings From Operations (EBIT) is not a recognized measure under IFRS. Management believes that EBIT is a useful measure as it provides investors with an indication of the performance of the consolidated operations and/or business segments, prior to interest expense and income taxes. Investors should be cautioned however, that EBIT should not be construed as an alternative to net earnings determined in accordance with IFRS as an indicator of the Company's performance. The Company's method of calculating EBIT may differ from other companies and may not be comparable to measures used by other companies. A reconciliation of consolidated net earnings to EBIT is provided below:

Reconciliation of Net Earnings to EBIT

(\$ in thousands)	2012	2011	2010
Net earnings	\$ 65,148	\$ 57,961	\$ 69,656
Add:			
Interest expense	5,809	6,026	6,077
Income taxes	26,161	25,322	14,539
Earnings from operations (EBIT)	\$ 97,118	\$ 89,309	\$ 90,272

For earnings from operations (EBIT) information by business segment, see Note 4 "Segmented Information" in the notes to the consolidated financial statements.

(3) Return on Net Assets (RONA) is not a recognized measure under IFRS. Management believes that RONA is a useful measure to evaluate the financial return on the net assets used in the business. RONA is calculated as earnings from operations (EBIT) for the year divided by average monthly net assets. The following table reconciles net assets used in the RONA calculation to IFRS measures reported in the audited consolidated financial statements as at January 31:

(\$ in thousands)	2012	2011	2010
Total assets	\$ 651.4	\$ 626.9	\$ 616.6
Less:			
Current liabilities	(149.8)	(127.4)	(117.1)
Other long-term liabilities	(42.0)	(39.9)	(20.4)
Net Assets Employed	\$ 459.6	\$ 459.6	\$ 479.1

(4) Return on Average Equity (ROE) is not a recognized measure under IFRS. Management believes that ROE is a useful measure to evaluate the financial return on the amount invested by shareholders. ROE is calculated by dividing net earnings for the year by average monthly total shareholders' equity. There is no directly comparable IFRS measure for return on equity.

GLOSSARY OF TERMS

Basic earnings per share Net earnings available to shareholders divided by the weighted-average number of shares outstanding during the period.

Basis point A unit of measure that is equal to 1/100th of one percent.

CGAAP (Canadian generally accepted accounting principles) The consolidated financial statements for the fiscal years 2009 and prior were prepared in accordance with Canadian generally accepted accounting principles as issued by the Canadian Institute of Chartered Accountants.

Compound Annual Growth Rate (CAGR) The compound annual growth rate is the year-over-year percentage growth rate over a given period of time.

Control label or Private label A brand or related trademark that is owned by the Company for use in connection with its own products and services.

Debt loss An expense resulting from the estimated loss on potentially uncollectible accounts receivable.

Debt covenants Restrictions written into banking facilities and senior notes and loan agreements that prohibit the Company from taking actions that may negatively impact the interests of the lenders.

Debt-to-equity ratio Provides information on the proportion of debt and equity the Company is using to finance its operations and calculated by total debt divided by shareholders' equity.

Diluted earnings per share The amount of net earnings for the period available to shareholders divided by the weighted-average number of shares outstanding during the period including the impact of all potential dilutive outstanding shares at the end of the period.

Earnings from operations (EBIT) Net earnings before interest and income taxes provides an indication of the Company's performance prior to interest expense and income taxes. See Non-GAAP financial measures on page 24.

EBIT margin EBIT divided by sales.

Fair value The amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act.

Gross profit Sales less cost of goods sold and inventory shrinkage.

Gross profit rate Gross profit divided by sales.

Hedge A risk management technique used to manage interest rate, foreign currency exchange or other exposures arising from business transactions.

Interest coverage Net earnings before interest and income taxes divided by interest expense.

IFRS (International Financial Reporting Standards) Effective for the 2011 fiscal year, the consolidated financial statements were prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board. Comparative financial information for the year ended January 31, 2011 ("2010") previously reported in the consolidated financial statements prepared in accordance with CGAAP has been restated in accordance with the accounting policies and financial statement presentation adopted under IFRS.

Return on equity Net earnings divided by average shareholders' equity.

Return on net assets Net earnings before interest and income taxes divided by average net assets employed (average total assets less accounts payable and accrued liabilities, income taxes payable and asset retirement obligations).

Same store sales Retail sales from stores that have been open more than 52 weeks in the periods being compared.

Trading profit (EBITDA) Net earnings before interest, income taxes, depreciation and amortization provides an indication of the Company's operational performance before allocating the cost of interest, income taxes and capital investments. See Non-GAAP financial measures on page 24.

Trading profit margin Trading profit divided by sales.

Working capital Total current assets less total current liabilities.

Year The fiscal year ends on January 31. The 2012 year which ended January 31, 2013 had 366 days of operations as a result of February 29th. The 2011 year which ended January 31, 2012 had 365 days of operations. The 2010 year which ended January 31, 2011 had 365 days of operations. The 2009 year which ended January 31, 2010 had 365 days of operations. The 2008 year which ended January 31, 2009 had 366 days of operations as a result of the February 29 leap year.

Eleven-Year Financial Summary

(5) Effective January 1, 2011, North West Company Fund converted to a share corporation called The North West Company Inc. The comparative information refers to units of the Fund. On September 20, 2006 the units were split on a three-for-one basis. All per unit information has been restated to reflect the three-for-one split except trading volume.

Nor'Westers are associated with the vision, perseverance, and enterprising spirit of the original North West Company and Canada's early fur trade. We trace our roots to 1668, and the establishment of one of North America's early trading posts at Waskaganish on James Bay. Today, we continue to embrace this pioneering culture as true "frontier merchants."
